

# GERMKLEEN™

**“The most effective antimicrobial Mosquito repellent known to man”**

New **GERMKLEEN™** product

## **SKEETOARMOR™** powered by Zoono®

This product is a non toxic, (antimicrobial, antibacterial, and antifungal) formula that has the unique properties of being a long lasting Mosquito & Flea repellent. This product is 100% DEET FREE and Non-greasy. Protect yourself with **SKEETOARMOR™** as the insect repellent to avoid ZIKA, West Nile or Chikungunya.

**\* Our Proprietary formula kills most harmful pathogens while providing a non toxic barrier against Mosquito's and Flea's.**

Available in Topical Skin applications of 10ml pocket size spray or 4 oz hand pump, dries quickly

Also Available as a Surface and Yard Fogger 12 oz.

### **\* FACTS:**

- No vaccine exists to prevent Zika virus disease!
- To minimize the risk of infection, the use of a quality insect repellent, **“SKEETOARMOR™”** is recommended (to avoid mosquito bites) and the wearing of long sleeved clothing (to keep exposed skin areas to a minimum).
- Mosquitoes that spread Zika virus bite mostly during the daytime.
- Zika virus can also be spread during sex by a man infected with Zika to his sex partners.

### **THE CHALLENGE:**

The question has now been asked whether Zoono would be effective against the ZIKA virus on surfaces and as a protectant on the hands.

The Answer is YES !!!

### **MORE FACTS:**

Zoono (and its active ingredient) has already been successfully tested against a number of viruses including MERS (Middle East Respiratory Syndrome), Swine Flu H1N1, Norovirus, Reovirus, Adenovirus, Influenza A virus, Influenza B virus, avian influenza, HIV, SARs, HPV, herpes simplex virus (HSV-1) and related Herpes viruses (HSV-2, EBV, CMV, HHV-6, HHV-8), Herpes zoster, Hepatitis A and C, Dengue (1-4), Yellow Fever, West Nile, and other encephalitis viruses and more.

**\*\* Has other applications in the Livestock and Equestrian Fields.**
