Back Panel:

Intense Whitening Serum harnesses the power of a synergistic blend of botanical actives to facilitate the reversal of skin discolouration for a noticeably brighter and luminous complexion. The integration of biomimetic peptide, WhiteTarget uses specifically designed peptide that is able to be directed to melanocytes to inhibit the activity of tyrosinase. It recognises and targets melanocytes with accuracy thereby giving maximum efficacy for a more even and balanced skin tone. In addition, Intense Whitening Serum is loaded with powerful antioxidants to effectively counter UV-inflammation, which is one of the main causes of skin pigmentation. It is also supercharged with a concentrated fermented solution to enhance whitening efficacy and improve nutrients penetration. With its wholistic approach of blocking epidermal melanin biosynthesis and preventing dark pigments from resurfacing, skin is rebooted to regain its youthful luminosity.

BENEFITS

- Superb skin brightening and whitening effects. Improves skin clarity.
- Helps suppress the formation of melanin to reduce pigmentations and dark spots for an even skin tone
- Protects against skin aggressors
- Neutralizes free radicals
- Moisturizes the skin
