### Why did I choose Montserrat?

\*I believe Montserrat is a nice looking bold font.

### Why did I choose Tahoma?

\*My business name is "FREEZINda" - which contains a capital "I" in it. Some fonts make a capital "I" look like an "l" or the number one (it's just not as legible). I personally like how Tahoma makes the fully distinguished capital "I."

If you find any other free commercial use font that makes a pronounced legible capital "I" then you can use :)
