## How eVoice Works to Keep You Connected to Your Customers

eVoice® is a full-service business phone system managed entirely in the cloud.

### It's Simple

You select a toll-free or local business number. We'll record a custom greeting with a menu of extensions. Then you decide where calls get routed and when. Your callers will only see your business number - no matter where you have the calls routed.

You'll sound professional to every caller. And you'll never miss an important call again. Here's a look at how easy it can be:

### CHOOSE A NUMBER (TOLL-FREE OR LOCAL)

A customer dials your toll-free or local business number

### GREET CALLERS PROFESSIONALLY

eVoice Auto Attendant professionally greets and manages the call

### ROUTE CALLS ANYWHERE

eVoice routes your call - to colleagues, your mobile, to your voicemail, etc.

### GET VOICEMAIL AUDIO FILES AND TEXT

We send the message as mp3 (or .wav) and text transcription if you wish.

**30-DAY FREE TRIAL**

No contracts. No Hardware.

## How eVoice Works

### Choose a Business Number and Set up Extensions

Choose a [Local](#) or [Toll-Free](#) number, or use the business number you currently have.

You can then create a menu of [Extensions](#) for your business - Sales or Customer Service, for example, or for specific employees (no matter where they're based).
