ATTN: Physicians!

Now you can

Outsource

the *dreaded* senior driving issue!

How?

Simply refer the older driver (and/or their concerned family members) to Keeping Us Safe's nationally-recognized "Enhanced Self-Assessment Program" for older drivers.

- This is *not* a clinical driving assessment. Rather, we help older drivers (and those with certain disabilities) with diminished driving skills make a *smooth* transition from the driver's seat to the passenger seat.
- Within 10 calendar days of the session, you will receive a written report detailing the results of the session.
- The 3-hour session takes place in the older driver's home, at the comfort of their kitchen table and includes an on-road driving exercise conducted in their own vehicle.
- Our program, titled "Beyond Driving with *Dignity*", is designed to help the older driver make a smooth driving retirement while simultaneously helping the individual maintain their pride, dignity and independence through what can be one of life's most difficult transitions.

Keeping Us Safe

Saving lives...one family at a time!
