Ringing in the Ears

*Tinnitus is also known as a ringing, buzzing, humming or other similar sound that some patients can hear in their ears. It affects nearly 50 million Americans and can be very disabling.*

Even though there is no cure for tinnitus, it doesn't mean there is no help or no hope – you are not doomed! Our Doctors of Audiology, have extensive training and years of experience with evaluating and

There are tools to provide the necessary education, counseling, sound/acoustic therapy to each individual towards managing your tinnitus.
