

Ringing in the Ears

Tinnitus is also known as a ringing, buzzing, humming or other similar sound that some patients can hear in their ears. It affects nearly 50 million Americans and can be very disabling.

Even though there is no cure for tinnitus, it doesn't mean there is no help or no hope – you are not doomed! Our Doctors of Audiology, have extensive training and years of experience with evaluating and managing tinnitus.

There are tools to provide the necessary education, counseling, sound/acoustic therapy to each individual towards managing your tinnitus.
