Managed Email Security
Managed Email Archiving
Managed Mobile Device Mgmt

Tech-MAR is an IT Solutions company that provides innovative and cost effective managed IT services, support and consulting to Large, medium and small businesses. Tech-MAR also specializes in designing, deploying, monitoring and managing IT network and datacenter, IT security, unified communications and Disaster Recovery solutions for small to the most complex enterprise environments. Our security practice can partner with our customers to provide security auditing for regulatory compliance such as HIPAA and PCI, security implementation services and full managed security solutions to meet our customer's needs.

Our goal: Become an extension of our customers business enabling them to focus on the business they are in and not on IT and communications. Provide a structured, methodical and complete process ensuring our customers have confidence in the value we provide and that they are protected effectively using our services. To help businesses better understand IT security and regulatory requirements while assisting them to protect and meet such requirements. Provide predictable monthly costs through proactive maintenance and management of their IT environment.

Services

• Managed IT Services

Provide proactive monitoring, management and support of customer IT systems and security to control and optimize ongoing operational IT expenses and reduce downtime caused by IT issues. Become extension of any organization to provide skilled resources at a fraction of the cost for in-house staff. Includes desktops, servers, network devices, etc. and most solutions

• Staff Augmentation Services (Contract workers)

Provide contract workers to supplement efforts of the client's internal staff in order to contain Costs and handle overflow work. Offerings: Short and Long-Term Solutions.

• Datacenter, Network and Security Consulting

Design, deploy, support and/or maintain network and datacenter systems and security solutions to provide the proper IT infrastructure for the client. Project based efforts.

• Disaster Recovery, Managed Backup and Business Continuity

Design, deploy, support and maintain disaster recovery and business continuity solutions. Tech-MAR's managed solutions provide constant off-site backup and recovery options to prevent costly downtime and keep operations running even during catastrophic failures.

• IT Project Management

Project manage complex project/product deliverables for infrastructure engagements from planning to deployment and delivering projects on time and within budget.

• IT Security Management/Compliance/Risk/Managed CISO

Identify existing and emerging security risks that pose the greatest threat to your core business goals by performing vulnerability and penetration testing, assessment and management along with other specialized security services. Provide shared CISO management allowing organizations who need executive security officer services but do not need a full time role for this position. Offerings: Managed CISO, Security and Compliance Assessments/Mitigation, Managed Security/Compliance Solution

• Privacy Sound Masking Solutions

Certified sound masking experts skilled in designing, installing and managing a sound masking solution for commercial office spaces, Doctors offices/patient rooms, legal offices, etc. Sound masking/privacy is also a concern when dealing with HIPAA and other regulatory compliance concerns

• IT Solution Design and Procurement

Design experts who understand available solutions in the market to match the proper and most cost effective solution that fits with the customer

• Web Design and Hosting Services

Full service web design and hosting services for simple to complex web sites. Hosting services are included with the managed services solutions.

• Cloud Solutions Specialists/Office 365

Design, implement and manage multiple cloud solutions to provide operational efficiency, exceptional redundancy and fault tolerance while controlling ongoing operational expenses.

• Microsoft Sharepoint

Design, implement and manage Microsoft Sharepoint solutions. Perform migrations/upgrades and/or customizations.

• Voice (Phone) and Video Expertise

Cloud based phone solution offered by Tech-MAR can reduce operational costs and provide enterprise voice services at a fraction of the cost of a normal solution. Can also provide design, implementation, management or repair of Cisco voice systems.

• IT Strategy

Proven experience in IT strategy and business alignment, practice provides organizations with strong resources to help build, implement and communicate IT strategy aligned with business
