Women's

Footwear and Last Recommendations for Common Foot Problems

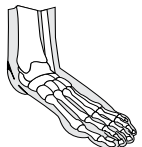

Common Foot Problems

Bunions: Bunions require footwear with a wide and deep toe box to accommodate the affected joint. Drew brand footwear has added depth or double depth, large forefoot capacity and soft yielding uppers. Lasts that work well for bunions include women's lasts 88, 46, 221, 237 and men's lasts 66 and 420.

Heel Pain: Heel pain – especially when standing – is helped by customized cushion inserts and added depth footwear. Heel pain is usually caused as a result of Plantar Fasciitis. Drew footwear with prescribed orthotics works well for this condition. Lasts that work well for heel pain include women's lasts 239, 801 and men's lasts 428 and 741.

Pes Planus: Correctly designed shoes will make the low-arched foot more comfortable. Depending on mobility, women's lasts 46, 88 and men's last 66, 420 and 401 work well for the rigid foot, while last 101, 401 and 420 works well for the flexible flat foot.

Plantar Fasciitis: Pain in the arch area is a symptom of Plantar Fasciitis, which can be managed by customized orthotics and proper footwear. All Drew brand footwear can accommodate prescribed orthotics, which help relieve the pain of Plantar Fasciitis. Lasts that work well for Plantar Fasciitis include women's lasts 235, 234 and men's lasts 420.

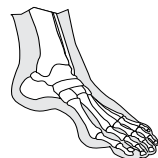

Hammertoes: Shoes with wide toe boxes and metatarsal lifts help the pain of hammertoes. Drew brand footwear with high toe boxes, removable cushion inserts, and soft leather uppers benefit this condition. Look for women's lasts 88 and 46 and men's last 66.

Ankle Valgus: Ankle roll in requires strong shoes with wedges or flares that reduce pain in the lower legs and ankles. Drew brand footwear, with its supportive heel counter, wide shank area, rigid heel tuck, and flared outsoles are ideal for Ankle Valgus. This footwear offers complete rearfoot control, thus helping balance and align the foot. Lasts that work well for Ankle Valgus include women's lasts 239, 101 and men's lasts 66 and 401.

Calluses: Accommodative inserts to reduce pressure will allow most calluses to lessen and sometimes disappear. Drew brand footwear, constructed with moldable, cushion inserts are accommodative to this condition.

Pes Cavus: A high-arched foot requires therapeutic footwear. A long medial counter provides support and stability. Drew lasts with modified inserts or orthotics are also beneficial for this problem. Lasts that work well for Pes Cavus include women's last 235 and men's last 66.

Ankle Varus: Ankle roll out requires strong footwear with wedges or flares that reduce pain in the lower legs and ankles. Drew footwear with its supportive counter, wide shank areas, rigid heel tuck, and flared outsoles are ideal for Ankle Varus. This footwear offers complete rearfoot control, thus helping balance and align the foot. Lasts that work well for Ankle Varus include women's lasts 239, 101 and men's lasts 66 and 420.

Last Recommendations for Common Foot Problems

Women's

Pedic 221 – See Pages 12 and 13

- Added depth combined with broad forepart
- Wide shank area for superior lateral stability
- Excellent for application to treat minor foot conditions
- 6/8 heel height

231 & 237

Pedic 200 – See Page 4

- Snug fitting heel seat
- Short back last
- Excellent for applications to treat minor foot conditions
- 6/8 heel height

200

Pedic 234 – See Pages 4, 8 and 9

- Added depth combined with broad forepart
- Wide base with mid-foot stabilizing shank provide arch support and stability
- Excellent last to accommodate prescribed orthotics
- 8/8 heel height

234

Pedic 80 & 801 – See Pages 5 and 14

- Added depth combined with broad forepart
- Wide shank provides superior lateral stability
- Excellent last to accommodate prescribed orthotics

80 & 801

Pedic 231 – See Page 11

- Added depth combined with broad forepart
- Wide base with mid-foot stabilizing shank provide arch support and stability
- Excellent last to accommodate prescribed orthotics
- 8/8 Heel Height

231

Pedic 101 – See Page 15

- Wide shank area provides superior lateral stability and also makes this last extremely versatile for orthotic applications
- Deep, broad forepart offers maximum capacity

101

Pedic 16 – See Page 17

- Added depth combined with broad forepart
- Wide shank area for superior lateral stability
- Excellent for application to treat minor foot conditions
- 6/8 heel height

16

Pedic 88 – See Page 16

- A universal last used in many applications for extreme foot conditions
- Deep, broad, oblique forepart offers more capacity than any of our other women's lasts
- Wide shank area provides superior lateral stability – extremely versatile for orthotic applications
- 8/8 heel height

88

Pedic 46 – See Page 16

- Wide shank area provides superior lateral stability and also makes this last extremely versatile for orthotic applications
- Deep, broad, oblique forepart offers maximum capacity
- 6/8 heel height offers excellent balance and weight distribution

46

Pedic 495 – See Pages 8 & 24 (Women's & Men's)

- Added depth combined with broad forepart
- Wide shank area for superior lateral stability
- Excellent for application to treat minor foot conditions
- 6/8 heel height

495

Pedic 235 – See Page 6

- Added Depth
- Universal Last
- Excellent for applications to treat minor foot conditions
- 8/8 heel height

235

Men's

Pedic 420 – See Page 24

- Deep, broad, oblique toe offers maximum capacity
- Wide shank area provides superior lateral stability
- Excellent last to accommodate prescribed orthotics

420
