Eyebrow Embroidery

What is it and how will you benefit from this unique method?

Eyebrow Embroidery is the latest trend, a manual technique within the permanent makeup industry for women and men. It is a semi-permanent procedure which will last between 12-18 months. First your eyebrows will be designed to best suit your eye and face shape. Upon confirmation of the proposed shape, 3D hair strokes are strategically placed in the epidermal layer of the skin with a thick pigment in several shades that does not change color, but slowly fades instead.

This technique is therefore more superficial than tattooing. Using a feathering technique with a unique hand instrument, this procedure creates a very natural look.

- Painless
- Fully restore the eyebrow shape or have fuller, perfect brows
- 100% Natural-looking brows for 24/7 confidence
- Results lasts 12-18 months
- Color fades instead of changing color like tattoos
- Strikingly similar to the hair of natural brows
- Look radiant and well groomed, even without makeup
- Correction is necessary only to define and highlight the already existing result over time
