

## Solar Savers

### We need you

Help pensioner households to save money and take control of their energy bills by installing an affordable, quality solar system and be part of an **Australian first**.

**Solar Savers** is a pioneering approach by Victorian councils to support pensioner households to install solar with **no upfront costs**. We've done the hard work of finding a **safe, reliable** and **quality** installer so pensioners don't have to.

### How it works

- ✓ Solar Savers checks that every person gets a solar system that pays for itself in energy savings from day one
- ✓ Solar Savers organises for the solar system to be installed
- ✓ Solar Savers supports pensioners to understand and get the most out of solar
- ✓ Pensioners gradually pay for cost through their usual rates payments at 0% interest

### Is my client eligible?

Refer clients who are:

- ✓ Homeowners
- ✓ Pension card holders
- ✓ Usually at home from 9am to 5pm
- ✓ Average to high electricity users (contact Solar Savers if unsure)

### Who is Solar Savers?

Over 20 Victorian councils have come together with support from the Victorian Government's New Energy Jobs Fund to run the Solar Saver program.

### What next?
