# COMFORT FLIP

---

## Cost effective mattress replacement

Innovative Technology replaces conventional materials in a mattress system that leapfrogs the competition in comfort, well-being, and sustainability. Engineered specifically for the health care environment, the Comfort Flip sleep system is comprised of materials produced in a non-toxic process that is safe for the environment and the user.

Fewer chemicals  
than typical foam,  
addresses infection  
control and does  
not leach toxic  
fumes

# Comfort

Coupling years of experience with comfort, allergy and odor testing the Comfort Flip mattress stands alone. At the core of each Comfort Flip sleep system is a unique combination of Indura™ Performance Polymers that are used in a multitude of industries from residential bedding, baby cribs, and furniture applications. The clean, green, comfort system is designed to ensure a great night's sleep for thousands of users around the world.

## Clinical Effectivness

The Comfort Flip line of sleep surfaces were designed to address three key contributing factors to skin breakdown.

- Pressure
- Sheer
- Heat and Moisture

Due to the Comfort Flip's unique open-cell construction, use of modern fibers, polymers and breathable moisture blocking covers, it has a distinct advantage over traditional denser materials found in many healthcare mattresses.

## Green Technology

The Comfort Flip system is produced with unique technologies that utilize the same materials recycled in water bottles and milk jugs. With this ability it is our goal to create sustainable solutions that address the life-cycle effect our materials have on the environment.

- Mold and mildew resistant
- Washable
- Drains liquids / Breathable
- Flame resistant
- Won't leach toxic vapors or odors
- No discoloration to sunlight or UV rays
- Hypoallergenic
