

ELIMINATE OVERHEAD COSTS IN YOUR HIM DEPARTMENT

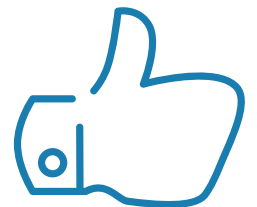

FULL SERVICE

HealthMark Group's Full-Service solution allows your healthcare facility to outsource the Release of Information (ROI) process in its entirety. As an extension of your facility, our HIPAA certified and professionally trained staff provide the necessary support within your Health Information Management (HIM) department.

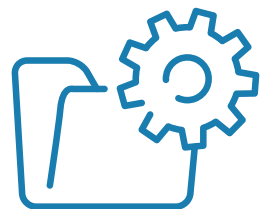

Reduce or refocus your staff within the HIM department by utilizing our Full-Service delivery model. With a dedicated team assigned to your facility, ROI duties will no longer be a burden. Our team will oversee managing walk-ins, phone calls, and provider support.

You can decrease turnaround time on all requests by having a dedicated person or team responding within 24-48 hours. Our facility representatives are able to focus on the frontend ROI duties while the backend processes are managed by HealthMark's central processing center.

Centralize the disclosure of protected health information across your entire organization. We develop a customized solution across all departments and locations to provide consistency in the compliant exchange of health information. This not only ensures efficiencies but also protects your organization from potential breaches.

ALLOW YOUR TEAM TO FOCUS ON WHAT MATTERS MOST, PATIENT CARE.

MEDRELEASE™ TECHNOLOGY

HealthMark's proprietary software, MedRelease is a Software as a Service (SaaS) platform that enables medical facilities to effectively manage and monetize the ROI process. MedRelease provides the necessary tools to stay compliant with complex regulations while streamlining the disclosure process for all parties involved.

- Reduced Overhead Expenses
- Secure PHI messaging
- Systematic E-Delivery
- Robust Audit Logs and Reporting
- Accounting of Disclosure and Tracking
- Integration with Electronic Medical Record (EMR) systems

ABOUT HEALTHMARK GROUP

Founded in 2006, HealthMark Group is an industry leader providing health information management and technology services for medical clinics and hospitals. HealthMark was founded based on the specific need to incorporate technology into the Release of Information (ROI) process. HealthMark's MedRelease software is revolutionizing the ROI industry as software designed to meet the need for a more efficient method of releasing medical records, while complying with increasingly restrictive HIPAA requirements.
