

TRANSFORM YOUR ROI PROCESS

SHARED SERVICE

HealthMark Group's Shared Service solution enables your healthcare facility to effectively manage the Release of Information (ROI) process internally by utilizing innovative technology and software developed by an industry leader. Our Shared Service option has transformed the conventional outsourcing model by providing an alternative solution for clinics and hospitals. By sharing the responsibilities, we share the revenue generated from ROI.

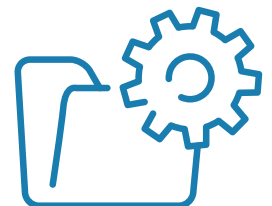

Reduce your ROI staff while continuing to maintain control of the process. By outsourcing the backend administrative duties to HealthMark and processing the frontend work through HealthMark's MedRelease software, ROI departments can handle the same workload with fewer employees.

Our Shared Service clients are able to reduce or eliminate overhead costs associated with the compliant exchange of health information. HealthMark Group is responsible for managing the backend duties to include invoicing, collections, shipping, faxing, tracking, and much more. HealthMark's innovative technology allows for automation to the administrative functions of ROI.

The Shared Service is a turnkey solution that can be incorporated into any existing ROI workflow. Enhance your patients overall experience by offering consistency in customer service, turnaround time, record delivery methods, tracking capabilities, and compliance.

ALLOW YOUR TEAM TO FOCUS ON WHAT MATTERS MOST, PATIENT CARE.

MEDRELEASE™ TECHNOLOGY

HealthMark's proprietary software, MedRelease is a Software as a Service (SaaS) platform that enables medical facilities to effectively manage and monetize the ROI process. MedRelease provides the necessary tools to stay compliant with complex regulations while streamlining the disclosure process for all parties involved.

- Reduced Overhead Expenses
- Secure PHI messaging
- Systematic E-Delivery
- Robust Audit Logs and Reporting
- Accounting of Disclosure and Tracking
- Integration with Electronic Medical Record (EMR) systems

ABOUT HEALTHMARK GROUP

Founded in 2006, HealthMark Group is an industry leader providing health information management and technology services for medical clinics and hospitals. HealthMark was founded based on the specific need to incorporate technology into the Release of Information (ROI) process. HealthMark's MedRelease software is revolutionizing the ROI industry as software designed to meet the need for a more efficient method of releasing medical records, while complying with increasingly restrictive HIPAA requirements.
