Shorter Treatment Time AND Extraordinary Results!

The *Carriere*® SLX™ Bracket System

**fast**

**gentle**

**natural**

 **HENRY SCHEIN**®  
ORTHODONTICS

*The New Movement In Orthodontics™*

# The Standard in Performance. The Reality in Value.

## The *SLX* Bracket System

It's the most exciting news in orthodontic appliance design in years. The completely re-engineered *SLX* Self-Ligating Appliance System. The *SLX* Bracket System resets the standards for excellence and performance in passive self-ligating brackets with numerous clinician driven innovations for clinical effectiveness and efficiency.

Discover the many innovative features of the *SLX* Bracket System—all designed to meet your ultimate goals—effective case management, optimal tooth positioning, and meticulous finishes.

# Your Peers are Raving About the SLX Bracket!

*"The switch from Damon to Carriere has been a big win in simplicity, cost, chair time, and treatment outcomes."*

– John Stieber, DDS, PS

*"SLX brackets include important design enhancements to improve tooth control and as such, will enable clinicians to take their SL cases to the next level."*

– David Paquette, DDS, MS, MSD

*"The Carriere Bracket System has the features to provide clinicians with greater efficiency, better finishes, and a lower price...I couldn't be happier."*

– Michael Ragan, DDS

## Optimal Bonding Base:

- Optimized Compound Contours base makes bracket seating intuitive, fitting nicely "like a glove". Each anatomically-derived, compound contoured base is tooth specific for exceptional bracket- to-tooth fit
- Adhesive Guard Rails™ (AGR) Technology allows for better bracket seating. AGR direct adhesive mesial-distal for faster, easier clean-up

## Performance and Finishing

- Tooth specific bracket widths for improved rotational control
- Deeper tie wings for easy, secure chain and elastic ligature use; no need to ligate or tie chain under wire
- Reduced slot depths for more precise tooth control
- Fully integrated (optional) hooks means no need for expensive, hard to handle drop-in hooks

# Exceptional Clinical Control and Meticulous Finishes—Outperforming the Competition.

## More Visual Cues:

- The SLX Bracket has multiple vertical and horizontal cues as part of the bracket design as compared to other competitors
- Improved bracket to tooth visualization improves bracket placement, therefore fewer bends, fewer rebonds and shorter treatment time

## Efficiency—A Matter of Time

- Upper and lower brackets open to the occlusal to avoid tissue interferences
- External clasp and spring with easy access for brushing ensure effortless, reliable functionality throughout treatment
- Smooth, secure, and simple to operate slides with audible and tactile cues
- Lower profile design for patient comfort and less occlusal interference
