One-Year Intensive Training Program

An exciting, comprehensive program with a 100% graduate employment rate

The 48-week CG Masters One-Year Intensive Training Program is designed to provide students the practical skills and real-world experience needed to thrive in the film and TV animation, and VFX industries. Students are mentored by our passionate instructors who have extensive industry experience. Each of our instructors knows exactly what it takes for students to be successful. We carefully crafted the program curriculum to teach students how to function in a real production team so that they can be highly-effective professionals once they enter the workforce.

Learn Animation & Visual Effects Production from the Experts

The world's first and sole simulated production training program

Our philosophy is unique. We don't focus on grades. Instead, we focus on preparing each of our students for the challenges of working as 3D artists such as animators, lighting TDs, riggers, modellers, composers and more. Our instructors teach you until you're confident in your skills. If you need more help, we train you until you're ready.

Students grasp valuable skills that employers are looking for over the course of three intensive terms:

1. Core Skills: An intensive introduction to skills involving cameras, modeling, animation, dynamics, lighting, composition, production, and more.
2. Transition into Practice: Expand on core skills with advanced training and team production.
3. Practical Training: Practical hands-on production and dailies training.

I was able to get my 1st job only two weeks after finishing this program. It is the future of VFX training. CG Masters has changed my life and changed the way that I think about the world around me. I would highly recommend this program above any other, to anyone wishing to pursue a career in the film industry.

Kelly Eckstein
Lighting Artist Graduate

The CG Masters Advantage

A program designed by industry, for industry

There's a reason why each of our graduates have found work in their field. We don't sell courses, we provide relevant training. In order to bring out the best in our students, we run a program that we know will maximize each student's potential.

CG Masters offers an un-paralleled training experience. Here are a few examples of what makes our school unique:

- » Affordable tuition for both domestic and international students
- » A faculty of 12 world-class industry masters
- » Maximum class size of 12 students
- » One-on-one mentorship
- » Employment opportunities
- » Scholarships
- » And more!
