Low Voltage Wiring

STS Solutions is certified in every current level of standard for wiring in our industry. Whether it's for a 50-employee office or a 500-employee office, STS can design, install and implement all of your wiring needs.

Voice - Data - Video - Audio

Audio Visual Systems & Service

STS Solutions can provide you with all of audio visual needs. We can provide TV displays, projectors, sound systems, and screens for your corporate office, training rooms, call centers, theater, or event centers. Whether it is a small installation of a TV to a conference room table or it is multiple displays and systems controlled via your network, smart phone, or remotes; STS can provide a timely, professional installation.

IT Services and Solutions

Whether you're tasked with implementing a new infrastructure or improving operations of your existing network, we can help! We are registered partners with today's most respected networking companies, including Microsoft, Cisco Systems, Check Point Software Technologies, Nortel Networks, Citrix, Ruckus, HP and Dell to name a few.

Whatever your business requires, STS can deliver. Please check out our wide variety of networking options listed below:

- Desktop Support Services
- Macintosh Support Services
- Server Support Services
- Office 365 Installations
- Security Services & Consulting
- Email & Messaging
- Audits & Analysis
- Backups & Disaster Recovery
- Wireless Networks
- Virtualization & Server Consolidation
- Cloud based Planning and Implementation
- MySQL/SQL Server Administration

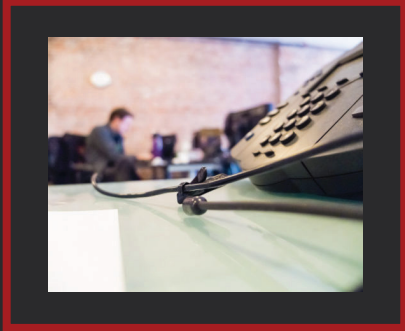

Wireless Internet Implementation

With the advent of wireless video streaming, wireless calling, and wireless call centers, a robust and secure wireless solution for business is a must. STS Solutions will provide you with a wireless internet service that will provide you with an internet connection that will not have signal issues, not have dropouts, and can be monitored and administered very easily.

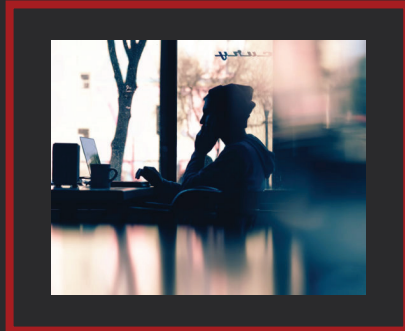

Telephone and VOIP Systems

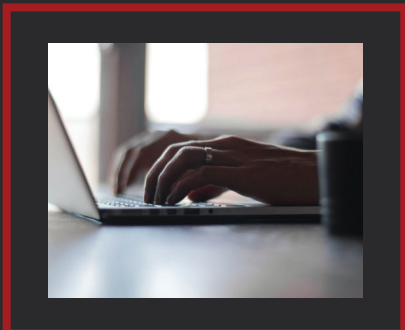

STS Solutions carries all major manufactures, including Cisco, Avaya & NEC. But we're not out to sell a name brand for the sake of selling a name brand. Our goal is to provide the best system and solution for our client's business - for now and for the future. STS can provide all levels of systems for the small business to the enterprise-level customer.

IP and High Def Circuit Camera systems

STS Solutions can provide you with the latest technologies in camera systems. Our camera systems are used for loss prevention, employee monitoring, crime deterrence, facility protection, operations monitoring, parking lots surveillance, and employee safety. Our camera systems can be depended on to provide you with a fully secure site.

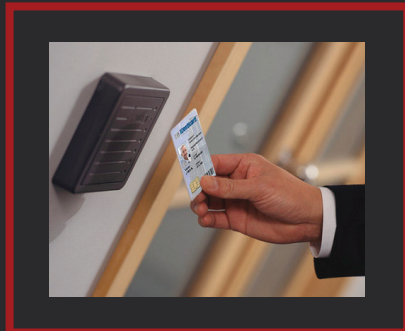

Local, Long Distance & Internet Services (Fiber, Bandwidth, etc.)

STS Solutions provides a total solutions package:

- Free expert consultation on all of your monthly telephone and Internet service costs (on average, we can reduce our clients' costs by 40%)
- The lowest industry costs for these services
- An update on all of the newest technologies

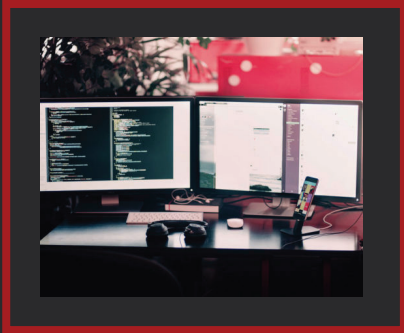

Card Access & Security Systems

STS Solutions can provide a state-of- your access control system to secure any size office space or facility. Our systems can be accessed via a key card, fob, fingerprint reader, and hand geometry reader. These systems can be used in conjunction with a camera system to ensure that you have a safe and secure facility.

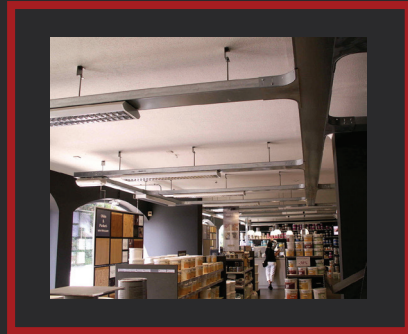

Sound masking systems

STS Solutions will provide your office space or facility with a complete sound suppression system. In many office environments, background noise and conversation can be distracting and not private. Sound masking systems are used to decrease the amount of echo in a space, decrease cross talk between areas in an office, and to decrease the general noise in your office allowing your employees to concentrate to their business at hand

Riser Management Services

STS Solutions currently manages 90+ buildings in the Chicago area. STS will inventory, track, maintain, and upgrade all of your buildings telecommunications infrastructure on a daily basis. We can also provide a plethora of technology services for your tenants that other riser management services simply cannot.

Free technology assessment

STS Solutions will provide you with a free technology cost assessment. We will completely audit all of your current monthly technology costs and provide you with an assessment on what costs saving there may be, what new technologies are available, and what the current market costs for these technologies are.

Design and Build

STS Solutions can provide a complete design and build of a possible new location or renovation of your current technology infrastructure. STS can design and build your server room, your wiring infrastructure, your IT infrastructure and your audio visual infrastructure. STS will provide this design and solution based on your businesses' use of technology, its needs, and its budget.

Services and Solutions for the real estate industry

Your clients'/ tenants' total **estimated technology move costs**.

STS will provide a **free** site survey of your client's current location assessing what hardware, services, and infrastructure should or should not be removed and reused, or whether it is better to purchase new.

STS will also provide a **free** site survey of your client's new location to determine what infrastructure is currently in place and what can be reused as well as determine what infrastructure will need to be in place by your client's projected move date.

Assist your client with **developing a budget** for any new IT and Telecom systems and services

A complete **design and build** of your clients' technology infrastructure for their new location including server room design and layout.

Your clients' **free** monthly technology cost reduction analysis.

Your client will have a **partner** in the technology field that will assure that any services, systems, and hardware that need to be purchased will be done at **the best** current market price. These services include but are not limited to:

- Low voltage wiring
- IT services, solutions, and support
- Audio visual design, installation, and integration
- Telephone systems. (Premise based, VOIP, hosted, and cloud systems.)
- Telephone services
- Internet and bandwidth services
- Wireless internet system design, installation, and integration
- Card Access and secure entry systems
- Camera and surveillance systems
- Sound masking systems

For many real estate professionals, STS will come in your client's current space before a possible move and provide a free assessment of all technologies with the result being a significant **cost reduction** as well as an **improvement** of the level of service.
