

BETTER SLATE™

BY ARTISAN STONE FURNISHINGS

Integrity • Craftsmanship • Creativity

INTRODUCTION

The beauty of natural stone has always been the choice of Architects and Designers and others looking for that one of a kind timeless statement the world over. Now available through ASF Ltd stone can be brought to you and your project at a price anyone can afford.

Better-Slates™ are a natural thin slate veneer that comes in a variety of formats and finishes. Being less than 2mm thick Better-Slates™ now can be used in an almost unlimited number of applications that could never be done before because of cost and weight.

Better-Slates™ are a natural stone panel for use in almost any indoor application. From backsplashes and walls to furniture and fixtures – if you can dream it chances are that Better-Slates™ can be a part of it.

FORMAT

Better-Slate™ comes in a 1” oversized 4’ X 2’ sheet (610mm X 1220mm) with a 1/8” MDF or magnesium backer board. Better-Slates™ are pre-sealed permanently that give the slate a color enhanced wet look to protect it from staining and regular wear and tear. It coating is environmentally friendly with no off gassing (No VOC’s). Just a few of the benefits of Better-Slate™ are:

- Natural Slate with variations in colour and texture.
- No sealing required as slate is coated
- Lightweight panels weigh 17oz per sq/ft
- Easy to cut. Can use regular wood working/carpentry tools
- Easy to install, low labour costs.
- Easily transported.
- No mechanical anchor or fastening systems.
- Coating will not change colour over time because of UV rays.
- Magnesium backer board is biologically inert. Will not support mould, mildew or fungus growth.
- Edges can be mitred or square, grouted, open, or sealed with caulking.
- Easy to apply with regular wall adhesive or thin set

WHY BETTER-SLATES™?

- Real Natural Stone
- Light Weight
- Ease of Install
- Perfect for the DIY
- Pre-sealed highly durable coating

Better-Slates™ are a natural slate stone panel. As with all slate products, slates are subject to wide variations in patter, color and texture. As a product of Mother Nature each piece is unique. As a natural product wide variations are to be expected between sheets and boxes of material. It is always recommended that the product is sorted before fabrication and installation so as to ensure the best looking outcome.

FABRICATION AND INSTALLTION

Better-Slates™ can be installed over most interior building surfaces such as drywall and MDF. Better-Slate can be fabricated using regular wood working tools and carborundum based saws and drill bits, no diamond or special tooling require (Please note that there will be increased wear on all blade and drill life over that of regular wood products). All Better-Slate sheets come 1” oversized so trimming the product to the desired size will be required. For full product description, fabrication and installation instructions please refer to manufacturers Product Description and Specification information.
