

Accumulator clamps

Accumulator clamps are used to safely mount hydraulic accumulators. MPC Clamps, Inc. has **over 35 years of experience** in designing and manufacturing mounting clamps and brackets for hydraulic accumulators.

MATERIALS

- Cold rolled carbon steel (AISI-SAE 1010)
- Cold rolled stainless steel (AISI-SAE 316)
- Other materials upon your request

SIZES

- Standard diameter range 3" to 10"
- Other diameters and sizes upon your request

ASSEMBLY

- High quality, resistant spot welding (RSW)
- Includes rubber cushioning and hardware

FINISHES

- Zinc plated
- Pickled and passivated
- Other finishes upon your request

DESIGN

- Extremely safe: upper clamp half connects straight to the mounting bracket instead of the lower clamp half. This ensures that the accumulator is secure at all times.

TYPES

- Single bolt type
- Double bolt type
- Other types upon your request
- Rounded steel eliminates sharp edges
