Automobile

Auto insurance getting expensive? Any young drivers in the family? We represent several auto and homeowners insurers who will help you “bundle” coverages & maximize good-student and multi-car discounts.

Homeowners/Renters

Do you know if your house or apartment is properly insured? Any students off to college soon? We can show you how a strong homeowners policy will cover you as well as your student’s belongings at school, and when you should get a separate policy for them.

Employment Practices Liability

We can show you how Employment Practices Liability is normally excluded from your business insurance, but can be written separately to cover harassment, wrongful termination, age discrimination, etc.

Health

Wrestling with “Obamacare” changes? We are fully certified to guide you through the best new plans. We offer individual and group health, senior products, and assistance with plan selection.

Office, Shops and Restaurants

We can quote several different business insurance carriers for you to locate the best possible coverage. For instance, we represent several of the top restaurants in the country on key coverages such as equipment breakdown and business interruption.

Worker's Compensation

Not sure when to begin a worker’s comp plan for your employees? We can tell you when you need it, help minimize premiums and even assist with year-end audits.
