

The project

We want our graphic to have depth. At the moment it is flat and looks like someone with little skill put a few pictures together.

The content of the graphic is correct but we wish that the presentation is more modern. The graphics show the difference between an IPsec connection and an MPLS connection to China. IPsec is monitored and MPLS is a private line that cannot be monitored by the Chinese government.

The goal is to depict the flow of data in a modern way. You can see a few icons for the German and the Chinese location. This is supposed to show a typical IT Infrastructure. If any of you are familiar with the subjects IPsec and MPLS, maybe you have other ideas of presenting this information.

Inspiration

To give you an idea of what we are looking for, here are some examples. The graphics below have nothing to do with our graphic, they are just to show you what TYPE of graphic we are looking for. They are just meant as examples and inspiration.
