Label Template

Visit this URL for more information

<https://www.containerandpackaging.com/item/G056F>

NOTE FOR DESIGNERS: This template is scaled at 100%, and represents a possible label shape and size that could fit this container. We highly recommend you order a sample, print your artwork to scale, cut it out, and confirm proper fit prior to submitting artwork for print. The **bleed line** allows the background artwork to extend beyond the trim line. This ensures a clean print all the way to the edge when the label is trimmed. The **trim line** is where the label is cut. This is the final label size. All critical text and design elements should remain within the **design clearance line**.

DISCLAIMER: Container & Packaging Supply assumes no responsibility for fit and function of label. Container & Packaging Supply assumes no responsibility for suitability of container, closure or decoration method for customer's particular use. It is the customer's responsibility to conduct product compatibility testing with containers, closures and decoration methods. Container & Packaging Supply and its affiliates are not responsible for consequential damages arising from customer's selection and use of containers, closures and decoration supplied by Container & Packaging Supply.
