

Rapid Deploy Camera Units- Operational in minutes

Intelligent Security Integration designs and manufactures rapid deploy camera units for use in incident and emergency management. Each unit is fitted with our unique bracket design, comes with a variety of camera types and is lightweight for ease of installation.

Each host unit can support up to 3 satellite devices (cameras, PoE speakers) running on a single battery for up to 7 days. The units can be deployed in minutes and create a site perimeter with no need for cable infrastructure or mains power.

Each unit has the capacity for unlimited cloud storage. Cameras can be viewed from any hand-held device, static or mobile command centre. Capable of being added to an existing surveillance network temporarily. Complete with SSL and certificates. AES encryption.
