NO HASSLE - QUALITY SERVICE - NO CONTRACT

Here are a few short steps to getting started with EDS:

Step #1 Sign & Fax the license agreement...

Our License Agreement will help determine the best solution to implement EDS' services with the office. EDS will provide free PMS interfacing software, which gives the office access to EDS' web-based claims submission to EDS.

Step #2 Schedule and installation & training date...

After the account has been created, one of our staff will contact the office to schedule installation and training with office staff.

Step #3 Submit a few test transactions to EDS...

Depending on the solution implemented, EDS installation staff will submit a few test claims to ensure the installation process was completed correctly.

Step #4 Begin transmitting today...

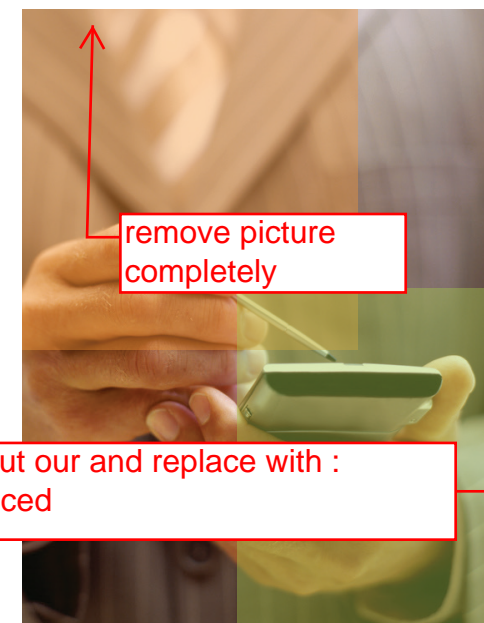

The office can begin submitting immediately to all Payers, though some claims may be sent on paper until such time that the payer approves your paperwork for EDI.

It's that simple!

Call Electronic Dental Services (EDS) today at (800) 482-3518 xt 800 to get started!

EDS is one of the largest electronic dental clearinghouses for dental claims and a leader in providing dental EDI solutions

STATEMENT PROCESSING

EDS provides clear, concise patient statements that create effective patient communications. Focus on improving the quality of how patients view statements. These easy-to-read billing statements help educate patients on their financial responsibilities, resulting in a higher payment rate and reduced customer service calls.

EDS provides Processing, Printing, Inserting, Return Remittance Envelope, Mailing, and USPS Postage at first class bulk presort rate. ** Included with this service is USPS NCOALink technology by US Postal Service which provides address forwarding for any listed change of addresses. This feature reduces cost and undeliverable mail. **

FEATURES

- Custom statement designs
- Full color printing options
- Backer/Duplex included in service; providing convenient marketing/custom office policies
- Online statement and document viewing through the EDS Portal
- Online access to statement reports with patient address updates through the Portal

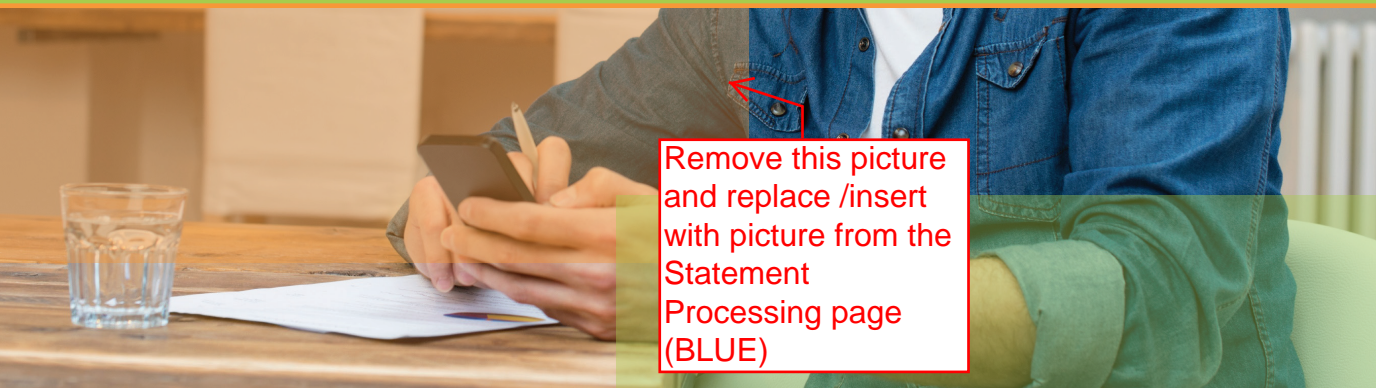

BENEFITS:

- Provides clear, concise financial statements
- Reduces customer service calls
- Saves money and time
- Helps improve cash flow through prompt billing
- Keeps the office in contact with past due accounts
- Reduces the necessity of maintaining a large inventory of mailing materials
- Decreases undeliverable mail and speeds collections by using the most current address information available.

Statement
Processing page
(BLUE)

What is AutoPost? Payment posting that accelerates the revenue cycle by automatically posting payments for virtually any payer that provides electronic EOBs/ERAs. Offices that are receiving EOBs/ERAs on the EDS Portal or would like to receive EOBs/ERAs, can now post them directly into the Dental Software Package.

EDS' experienced staff will work closely with each client to create a customized AutoPost solution in the EDS Bridge that will interface with the Dental Software Package. AutoPost will post primary and secondary claim payments, contractual adjustments, rejection notes, and claim status notes. The results of this combination is very significant and will benefit the office by increasing efficiency and reducing human error.

FEATURES

- Automated payment posting for participating Government and Commercial payers
- Robust decision support
- Tailored error and exception rules
- Customized solutions that work with qualified Dental Software
- Easy integration

BENEFITS:

- Detailed reporting every step of the way
- Elimination of manual posting of EOBs/ERAs
- Automation that saves time and reduces errors
- Fast identification of claim discrepancies
- Customizable solutions that fit any provider's business needs

per claim posted

ACCOUNTS RECEIVABLE AGING

Office staff spends too much time on the phone with insurance companies trying to figure out why claims are not paid. EDS has an exceptional AR Aging integration that will reduce valuable time spend on the phone by 50 – 75%.

Currently, office staff create a spreadsheet of outstanding insurance claims and prints it for review. The spreadsheet is generally listed alphabetically by Insurance Company name. Office staff then begins the long process of calling each insurance company and waits on hold for a customer service representative. This often times results in finding out that the patient didn't have coverage, the claim was not received or there was something wrong with the information sent on the claim.

EDS has streamlined this process. EDS is able to reconcile the outstanding Insurance Claims from the office Dental Software to EDS and can tell what has been Paid, Rejected and/or Processed.

EDS also offers a service where EDS Staff will follow up with the outstanding claims and report back the results in a single, easy to read report.

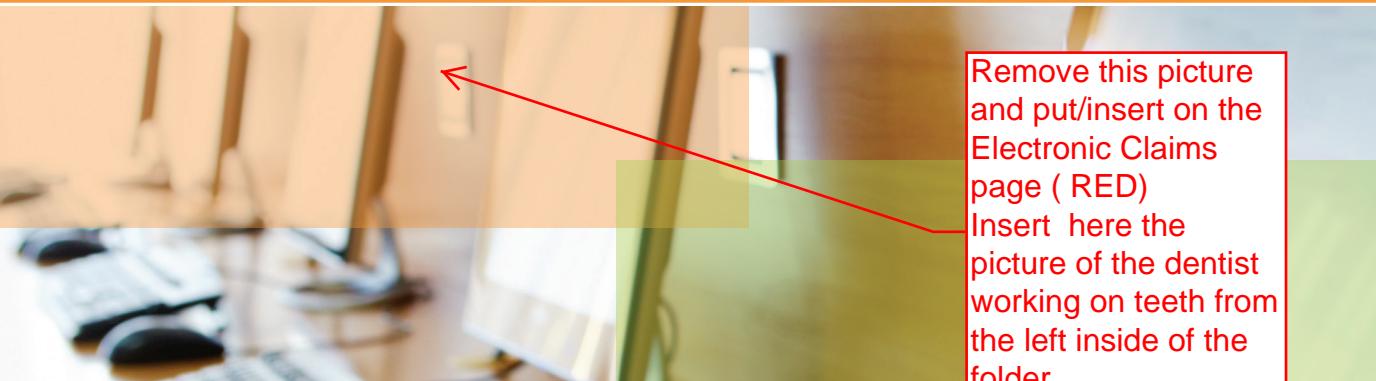

FEATURES

- Online Tracking of claims
- Easy 1 click to check the status of claims
- Ability to correct and resubmit or just resubmit claims
- Options to track claim results and enter notes into the claim
- Easy integration
- Eliminates time being spent on the phone with insurance companies

For as low as \$49.95 per month. If you have questions, Call us today at (800) 482-3518

REAL-TIME ELIGIBILITY VERIFICATION

Insert here the picture of the dentist working on teeth from the left inside of the folder

This service is an easy-to-use solution providing instant connectivity to leading commercial and government insurers. This service will help the office automate time-consuming business functions while improving patient services.

EDS' real-time eligibility consolidates multiple payers from a single screen with a one source solution. This allows dental offices to receive eligibility and plan benefit information immediately from insurance companies. Most importantly, the eligibility information received is displayed in an understandable and easy to read format that can be printed and used for patient.

ELECTRONIC CLAIMS

EDS takes all of the paper and most of the work out of insurance claims. Filing dental claims electronically eliminates the data entry and follow-up steps required by paper claims. Electronically filed dental claims are submitted more efficiently and with fewer errors and omissions. This means faster turnaround time and fewer returned or denied claims because of manual data entry mistakes.

BENEFITS:

- NEA Integration
- Decreases time spent preparing claims
- Reduces errors and omissions
- Speeds submission and processing of claims
- Expedites reimbursement
- Eliminates postage, supplies and mailing tasks
- Reduces rejected claims
- Increases productivity and efficiency
- Improves cash flow
