

Vehicle smart repair is a trade recognised alternative to the traditional body shop repair.

One of the main benefits is, that unlike a traditional body shop, most repairs within the SMART (small to medium area repair technology) repair concept can be carried out within a day, usually at your home, or place of work, and at a price of more than 50% reduction on traditional body shop costs. This makes it a very convenient, cost effective alternative.

The Colour Smart system carries a lifetime guarantee (based on your ownership of the vehicle). Unlike traditional body shop repairs, only the area damaged needs to be refinished, thus preserving the integrity of the original paintwork.

The Colour Smart paint system is also fully compliant with EU legislation, so enabling us to carry out repairs without the need for expensive spray booths or premises.

Your local specialist has over ten years experience in Smart Repair.

Paintwork Scratches & Scuffs

Colour Smart is usually able to repair the scratch without re-painting the whole panel. This reduces cost and time, ensuring your car is back on the road with minimum inconvenience.

Door Mirrors

Scuffed or scratched door mirrors repaired and repainted

Alloy Wheels

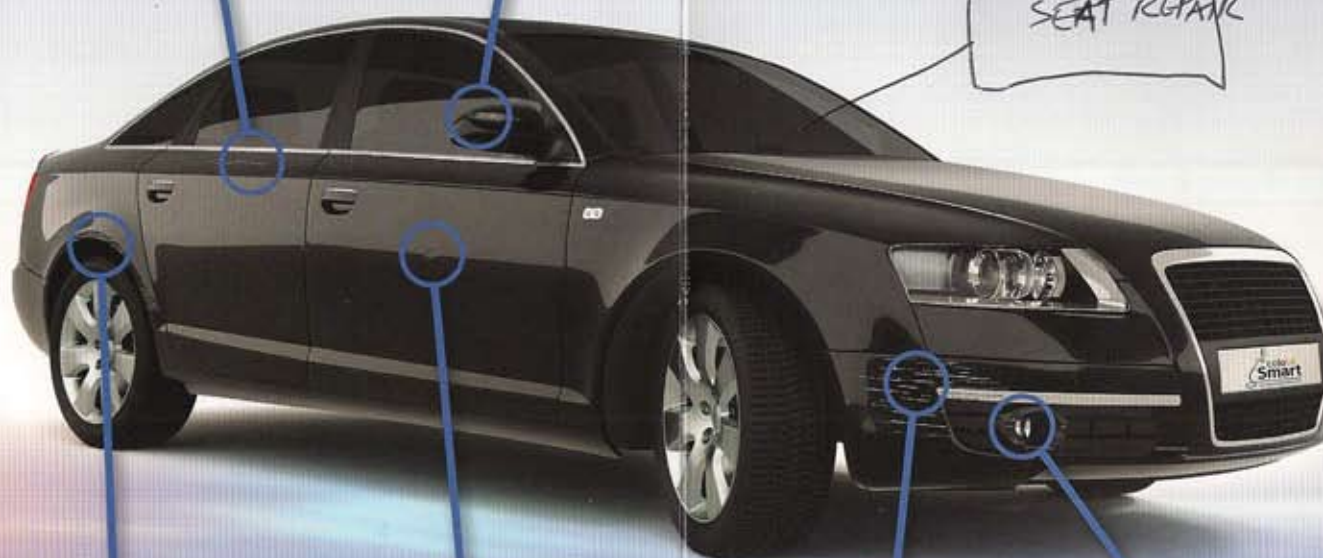

Alloy wheels can be restored to showroom condition.

- Kerbed alloys
