

VIEZU™
REASSURINGLY POWERFUL

ENTER THE WORLD OF TUNING

Powered by Viezu performance solutions

Join the worldwide Viezu network. Here's why..

- **LOW, LOW cost set up**
- **Make around £200 profit per job in under 1 hour**
- **Very profitable and 'easy to do' service**
- **Proven, insured and guaranteed quality from the best in the business**
- **Full support and file service 7 days a week**
- **More R&D into tuning files than any other tuner**
- **Only tuning company with ISO certification**
- **Chosen by the biggest fleets, race teams and developers in the world**

Viezu Tuning - Powerful enough to support your business

Viezu has successfully established itself as one of the leading vehicle tuning software and car tuning companies in the world, now supporting over 600 dealers in 64 countries around the world. We have developed a name and reputation for providing consultation, research and development to some of the world's best automotive brands, including vehicle manufacturers, race teams, vehicle stylists, fleet operators and tuners alike.

With over 5000 vehicles tuned every month; Viezu software has won several awards and our name is recognised internationally for our research and development in the tuning industry.

Viezu software is fully insured and we are the only software providers who are ISO9001 certified. Research and development is done on our own 3000bhp rolling road dynamometer with proven, accurate performance and emissions testing.

BlueOptimize TM – Viezu's fuel saving technology has been used by some of the largest fleets in the world including (BT GROUP) BRITISH TELECOMS, who famously had their fleet of over 24,000 vehicles tuned by Viezu netting them annual fuel savings estimated at over £4,000,000. The huge carbon emissions reductions have lead Blue Optimize to win many awards such as the prestigious 'Queens award for Enterpriseinnovation2014'.

Remap Options

VPERFORMANCE – Available for suitable diesel and petrol engines.

Designed to deliver the maximum performance gains within the safety limit of the engine, as much as 40% in some cases.

BlueOptimize – Available for turbo diesel engines. This fuel saving technology optimises combustion, enhances low end torque allowing earlier gear changes, consistently lower RPM's and less throttle input thus saving up to 20% fuel. Rev limiting and top speed limiting is popular with fleets.

VBLEND – Available for turbo diesel engines. A blend of both power and economy, low end torque and a wider power band makes this the most popular remap option with customers.

Also available:

Exhaust Gas Recirculation (EGR) Solutions

Diesel Particulate Filter Solutions

DTC Codes

Hot start fix solution

Speed Limiter removal or application

Lambda

Engine modification tuning – i.e. turbo, manifolds, intake, exhaust upgrades etc.

Special request research and development

**NO EXPERIENCE WITH TUNING? DONT WORRY, YOUR JOB IS VERY EASY,
AND WE HANDLE THE HARD PART.**

Step 1: PLUG INTO OBD PORT ON VEHICLE

Step 2: READ ECU FILE (usually less than 5 mins)

Step3: SEND US THE ECU FILE FOR TUNING

Step 4: RECEIVE MODIFIED FILE (LESS THAN 30 MINUTES)

Step 5: WRITE IN MODIFIED FILE (usually less than 5 mins)

Step 6: DRIVE VEHICLE

Every time you tune a vehicle, the whole process including the test drive should take under an hour. While we tune your customers vehicle, you can continue about your work and we will notify you when the new software is ready.

This way, tuning is a hassle free service that you can add to your business without the need for any previous tuning experience, with great profit margins and very little time consumption.

Every vehicle tune is backed up with a **30 day no quibble money back guarantee**, so if you or your customers are not 100% satisfied, we will issue an instant refund and return the vehicle to original. Each vehicle is custom tuned to your customers requirements. Some customers want power, some want economy or maybe a blend of both.

Other requests such as DTC error codes, VW hot start issues, EGR & DPF issues + more can be solved for most vehicles also.

GETTING STARTED

In order for us to custom tune vehicles for you, you will need to own the necessary equipment for reading/writing ECU software.

As official Alientech dealers, we can supply you with everything you need to start tuning at a very reasonable set up cost. Alientech are an Italian manufacturer of tools, and we do not sell tools for a profit.

Kess V2 OBD Tool: Allows reading and writing of ECU file via OBDII diagnostic port and covers the majority of cars, vans and jeeps.

Kess v2 with car-bike –van –jeep protocols is €2000.00 incl. 12 months subscription. 12 months subscription renewal is €1000.00

Ktag bench tool: For ECU's which cannot be read via OBD, the Ktag is the tool which allows bench programming. The ECU will need to be opened, and connection is made by soldering directly on to the board or using special adapters.

To purchase KTAG, the cost is €1000.00 + protocol fees.

Protocols: excl. VAT at 23%

Kess v2: €900.00

Kess v2 Car- Bike protocols €1100.00

Kess v2 Truck OBD protocols: €1700.00

Kess v2 Agricultural OBD protocols: €1700.00

Kess v2 Marine OBD protocols: €700.00

Kess v2 CAR -BIKE - Truck OBD protocols: €2500.00

Kess v2 CAR -BIKE - Agricultural OBD protocols: €2500.00

Kess v2 Truck - Agricultural OBD protocols: €2500.00

Kess v2 CAR -BIKE - Truck OBD protocols: €2500.00

Kess v2 Full OBD protocols: €3200.00

Kess v2 Truck cables: €1850.00

Kess v2 Agricultural cables: €1450.00

File prices:

1 file: £89

5 files: £395 (£79 each)

10 files: £690 (£69 each)

20 files: £1180 (£59 each)

RRP: £250 - £400 depending on vehicle

Profit around £200 per job in under 1 hour

File prices are excluding vat
