Dealer Information

1

We take dealers onto our remapping network, empowering you with the means to provide your customers with the highest quality tuning and re-mapping products

We give you the tools, training and support to provide a high quality, professional remapping service on a range of over 4,500 different cars, vans, Hgv, Bikes, Boats and tractors from 2001 onwards. Turbo diesels are the most popular for remapping. In addition, we cover turbo-petrol, specialist sports and super-cars.

The standard KessV2 covers virtually every need, except for the very latest Bosch EDC17 ECU's, which require an upgrade to a Tricore boot-mode kit for an additional fee. If you want to specialise in trucks or tractors, we can offer further upgrades.

2

- » Online automated upload/Download system
- » We pride ourselves on the absolute quality of our Tuning files

3

Dealer File Bundles

Our file bundle plans are simple, easy to understand, with no hidden surprises. We offer the lowest cost quality tuning files in the remapping industry; the more you buy the cheaper they are.

- **1x File are £80**
- **6x Files are £390 - That's £65 per file**
- **14x Files are £840 - That's £60 per file**
- **20x Files are £1100 - That's £55 per file**
- **25x Files are £1250 - That's £50 per file**
- **150x Files are £5250 - That's £35 per file**
- **250 x files are £7500 - That's £30 per file**

Unlike some businesses, our file packages have no expiry date, allowing your business greater flexibility to expand with controlled costs.

Normal file service hours are 8:30am-6:30pm GMT weekdays, 8:30-4pm Saturdays. We are available at all other times by advance request. All dealers have access to the same prices and get the same level of service. We do not offer a cheaper 'no-frills' file service, we prefer to work to the highest possible standards.

SINGLE PRICING POLICY

We don't believe in hiding price increases for certain vehicle types, so the price you see is the price you pay for a standard Stage 1 tune. You choose our Orange, Black or Green tune, plus any combination of available DPF, EGR or speed limiter solutions. If it's a truck, tractor or HGV then, again, it is one file cost.

VAT

All prices listed are subject to VAT at 20%, unless in Europe with a valid VAT number; or outside the EU.

DPF SOLUTION

We are at the forefront of providing software for DPF solution on supported vehicles - this can be a valuable income stream and is included in your tuning file cost.

****All prices plus VAT and dealer applications are subject to approval****

WHITE LABEL FILE SERVICE / CONFIDENTIALITY

- » Joining the Monster Tuning dealer group can be good for your business, but this might not suit everyone, so we can supply you on a confidential basis, completely transparent to your customer base.
- » This is something we currently do for dozens of well established companies around UK, Europe and the rest of the world.
- » If ever questioned about the source of your files by a customer, you simply tell them that you employ a top file writing company, under contract.
- » You still get all the benefits of our technical support and free training. If you are in an area not covered by an existing dealer, you will also receive customer leads.

4 | Buy Your Own Tool

Monster Tuning are Official UK Alientech Dealers and sell their full range of products.

You can buy your Alientech Kess v2 tool from £1500, which includes your first 5 tuning files and remote installation and training. You can then buy files in packages of 6, 14, 20 or 25 files. (12 months' worth of subscription and Alientech Protocol updates are also included)

KESSv2 - SLAVE VERSION

14P600KS01	KESSv2	KESSv2 Slave (Tool)	Tool and following cables: 094300CAN1 - 14P600KCK4 - 144300K201	£550	20%	£110	£660
14P600KS03	KESSv2	Car - Bike OBD Protocols	Slave protocol activation for Cars, LCVs and Bikes. Included 12 months of subscription.	£700	20%	£140	£840
14P600KS02	KESSv2	Truck OBD Protocols	Slave protocol activation for Trucks. Included 12 months of subscription.	£1400	20%	£280	£1640
14P600KS05	KESSv2	Agriculture OBD Protocols	Slave protocol activation for Agricultural Vehicles. Included 12 months of subscription.	£1400	20%	£280	£1640

14P600KS09	KESSv2	Truck - Agriculture OBD Protocols	Slave protocol activation for Trucks and Agricultural Vehicles. Included 12 months of subscription.	£2500	20%	£500	£3000
14P600KS06	KESSv2	Full OBD Protocols	Slave protocol activation for all groups. Included 12 months of subscription.	£2800	20%	£560	£3360

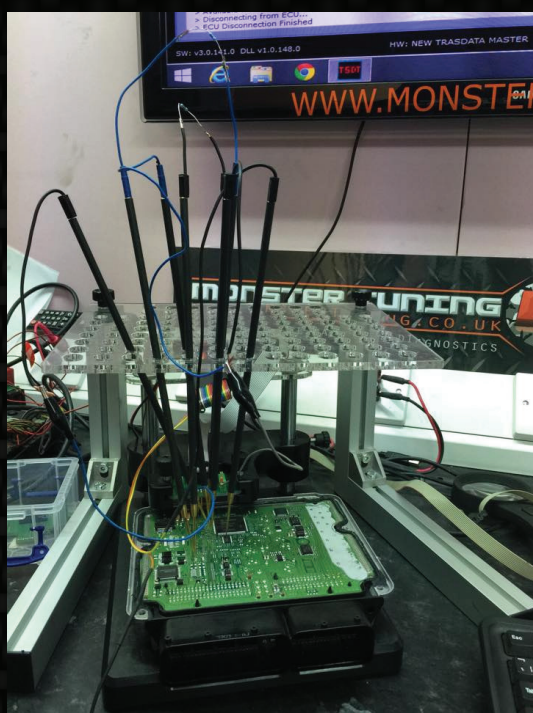

ALREADY OWN YOUR OWN TOOL?

If you already have KessV2, Cmd or Genius Slave tools, then it needs to be released from your existing tuning company (which they may charge you for) and then be transferred to our Master.

You will then need to purchase a minimum file package to be able to use your tool. (Masters just buy min file package)

5 | Bench ECU's

We encourage everyone in their business to invest in a Alientech ktag system for doing ECU-off work. For dealers that don't have this facility, we can provide a bench programming service for £120 including the file. Simply send or bring the ECU to us and we will turn it round same day (allowing an extra day if posted)

6 | Dealer File Bundles | ECU Tuning Files

When you become a Monster Tuning Dealer you will enjoy:

- » Excellent Profits
- » Very low start-up costs
- » Full training & support
- » No franchise fees
- » No management fees
- » No marketing levies

QUALITY TUNING FILES

At over 500 vehicles a month, we know how to write quality tuning files. This is the absolute core of our business and we are very good at what we do. Look at some of our dealer testimonials to see what they think. We have a team of experienced file writers; therefore, you are not reliant on just one person.

GREAT TECHNICAL SUPPORT

Quality technical support starts with knowledge, so every dealer is offered comprehensive remote training, completely free-of-charge. Our experienced Support Team are available to provide unmatched technical help and advice.

FAST TURNAROUND

Time is money and we know that a quick, reliable file service is very important to you. Our files team is targeted to turn a tuning file round in an average of 30 minutes. Our advanced system <http://files.monstertuning.co.uk> keeps you fully informed via the news page.

SUPPORT PACKAGES

- » Full training given
- » Full technical support
- » Quality product
- » Approved dealer website listing

7

The Facts

- » We are bound by strong ethics and complete honesty in our business
- » We will remap over 6000 vehicles in 2016
- » We do all of our remap files and technical development in-house
- » Our remapped engines have already covered over 150 million miles
- » Our files team is one of the most experienced and talented in the vehicle tuning industry
- » We supply dealers in the UK, Europe and Worldwide
- » Our dealer sales, marketing and warranty package is second to none

8

The Monster Opportunity

This could be quite simply the most profitable area of your business:

- » 30-40 minutes per vehicle
- » Sell at £250-£300 per vehicle
- » Cost is less than £70 per vehicle
- » Profit of £200-£250+ per vehicle
- » Break-even just one vehicle per month
- » No long-term commitment

BECOMING A MONSTER DEALER

- » The time is right to become part of the Monster Tuning dealer network and introduce quality remapping into your business, with a low entry cost into the industry
- » Our dealers enjoy the lowest cost per vehicle in the business with 100% support from one of the most experienced file tuning teams out there.
- » Your customers will enjoy the best quality remap with a 30-day money back guarantee for their total piece of mind. No other remapping company can match this.
- » Dealers who join us are fully trained to provide the service to our highest standards. If you need to expand your skill set and learn new processes, further training is free-of-charge.

9

Tuning Files Service

This is the absolute core of our business, with quality and service standards second to none - which is why so many top tuning businesses worldwide use us for their tuning files. All our files are custom written in state of the art 3d mapping software that is licensed to Monster tuning.

Our files team is targeted to turn a file round in an average of 30 minutes. Different versions of the file are available to suit your customers' needs; whether it's maximum fuel economy (Green), or performance (Black) or a blend of the best of both (Orange).

PERFORMING A REMAP

- » As a trade professional, you will already be confident to connect equipment to the diagnostic socket.
- » The Kessv2 is a sophisticated protocol tool that plugs into the socket and then connects to a laptop in order to modify the vehicle.
- » The process is straight forward and controlled, with the software guiding you the whole way through, firstly the initial vehicle identification then onto reading the ECU file.
- » This file is uploaded to our files system , we then will make the modifications and return the file to you to be written on the vehicle.

Typical hands-on time is approximately 10-30 minutes.

10 | Quality Training – Knowledge is Power

We have years of technical experience and expertise and have used this to build a suite of training courses to support our dealer training and development program.

- » Basic OBD Programming
- » Advanced Bench Programming
- » Advanced Trasdata/ktag Programming

WHY TRAIN?

It is quite ludicrous to believe that you can run an effective remapping business without thorough training giving you detailed and expert knowledge. We believe that the more you know about tuning, the more confident your customers will be and thus the more profitable your business can become.

FREE TRAINING

Our strategy for dealer training is very simple. The more you know the more files you will do. This, of course, benefits both of us. Therefore, all OBD and bench programming training is completely free of charge to Monster dealers. Whether you buy a tool from us, or have your own tool and simply buy files, then you are welcome to have training. At the same time you meet our team and understand how we work which all helps build your confidence to enable you to grow your remapping business.

ONE-TO-ONE

Our experience of training literally hundreds of people is that group training, or the seminar approach does not work. With people naturally varying experiences and ability it is therefore important to ensure that courses are not run to the lowest ability.

All Kess/OBD training is done via our remote support application to ensure the best quality training, and most importantly, that you are completely confident in the remapping process.

- » Here at Monster Tuning, we don't just take on dealers to make the numbers up, we want both of us to be mutually successful in the remapping business.
- » Where many of our competitors make substantial income from charging excessive up-front dealer or franchise fees, with us its entirely the opposite; we make an investment in your long term success.
- » Once you have decided to go ahead you can normally be up and running within a week, dependant on stock.
