THE DUMPSTER GUARD

BACK

COVER

BEFORE

"The best ideas come from solving problems."

As commercial real estate owners, we constantly strive to maintain the look and integrity of our properties.
The dumpster enclosure is the most overlooked area of a commercial property site and the most likely to be damaged by the carelessness of others. Whenever we developed a new property, little attention was placed on protecting the walls of the dumpster enclosure as well as the control of the placement of the dumpster container on the site. We have used the standard practice of installing bollards within the enclosures, but not surprisingly, the enclosure walls were still being damaged. Needless and costly repairs sparked an idea as simple as the hula hoop-
The Dumpster Guard™. If we could control the removal and the replacement of the dumpster, our problem would be solved.

The average cost of repairing or replacing a damaged dumpster enclosure is between $1500 - $7000 with no guarantees that the same damage will not occur again.
***The Dumpster Guard*™ provides the added assurance by preventing the problem.**

THE DUMPSTER GUARD

AFTER

The Dumpster Guard™ was developed for the purpose of *"Taking Control Back."* Engineered and patented, our product has been installed and tested at many of our franchise locations such as Starbucks, Ihop, Dunkin Donuts and Party City.
These locations were chosen because of their excessive turnover of dumpster containers and the ware associated with their enclosures.
The Dumpster Guard™ has exceeded our expectations.

We are also proud to offer a product that is "Made in the USA."
