## PRO-SELECT ERECTING™

We understand that for many customers, finding erecting professionals to erect their building can appear a formidable task. Finding and selecting a crew that is skilled, takes pride in their craft, is reliable, licensed, insured, and certified is - for most people - analogous to finding the proverbial needle in a haystack. This was one of the motivating factors for us to initiate our Pro-Select Erecting™ program.

Pro-Select Erecting™ crews are independent erectors who are carefully selected, highly skilled professional erectors who meet very strict criteria we put forward. Pro-Select Erecting™ crews must not only have significant industry experience but most also adhere to our philosophy regarding our commitment to the customer. The vast majority of our customers don't get the opportunity to visit one of our offices, so the erecting crew is the only "face" of Buck Steel they get to see.

Since its inception, our Pro-Select Erecting™ crew program has resulted in hundreds of satisfied erecting customers all over the US and Caribbean!
