

STANBOND

SIMPLY THE BEST TRACK GUIDED BLIND SYSTEM

FEATURES

Stan Bond Roman Blinds use superior system fittings that ensure years of trouble-free use. This includes quality cordlock and pulley operation with aluminium 'no sew' battens that will not warp like some timber battens, and self-aligning cord guides that ensure shades will raise and lower without skewing.

FUNCTION

Roman Blinds are not just any window covering. Not only do they cover the window and give good light, glare and temperature control, they add an interesting design element to your interior decor. Roman Blinds give a plush, well appointed feel to the room.

The translucent fabric range of Stan Bond Roman Blinds creates a soft, filtered light effect whilst providing good levels of privacy. By utilising a blockout fabric this will allow even greater light control and privacy while maintaining the elegant look of the blind.
