About Phoenix Spine Care Network

Phoenix Spine partners with chiropractic care physicians and their patients to form the Phoenix Spine Care Network. Our goal is to help ensure patients suffering with low-back pain get the right care at the right time.

Phoenix Spine created www.phxspinecare.com as an educational resource for patients with low-back pain. Treatment guidelines, detailed knowledge center articles, and other helpful patient education information is all available on www.phxspinecare.com.

Phoenix Spine provides the premier patient experience using evidence-based practices to eliminate neck and low-back pain in the least-invasive manner. We seek to revolutionize care for neck and back pain by applying a patient-focused population health care paradigm that is fully integrated with all physicians.

Join us for a happy hour event with Wine Tasting, hors d'oeuvres, and dessert, while we discuss the new American College of Physicians treatment guidelines and non-invasive treatments for acute, subacute, and chronic low-back pain.
