

PRECIOUS CARGO. IT'S OUR BABY TOO.

Freight. To us, it's never simply an export receipt, airway bill or a container full of goods. It's an integral step in a supply chain for business, and it's not just any business - it's yours.

Introducing Thrift - your specialised and proactive logistics partner, and the first freight-handling business to think the way you do.

Thrift knows time and money are in short supply, so we work with you to develop the most efficient and cost effective solutions for your business, no matter what you do.

We're small and dedicated, with a vast global network quite literally at our fingertips. And most of all, we care. That's the very least you should expect from a partner.

If your freight is an everyday commodity, time sensitive, hazardous or fragile, call us. We accept all major credit cards. Thrift will make sure it arrives safe and sound, by the date you're expecting.

That's the Thrift way.
