The **SKYSTAR** corporate office is based in St. Louis Missouri and the dynamic team represents high profile competence, specialized know-how, unparalleled reliability, proven successful operations coupled with a keen eye for detail.

These characteristics constitutes a solemn promise to our clients that *the difficult we will do today and the impossible we will complete tomorrow.*

ABOUT US

The **SKYSTAR** team are the pioneers of Observation Wheels in the United States as we brought the first one to the East Coast and then we stepped up our game by bringing the largest transportable Observation Wheel to the United States and effortlessly took on the challenge of placing an iconic structure in the middle of a downtown urban location. We will tackle any challenge to bring a spectacular attraction to where you want.

Safety is paramount to our operation and we have a 100% safety track record with all of our operations. We've benchmarked safety and inspection techniques used on high-tech military aircraft and the **SKYSTAR** team never compromises on our commitment of excellence in all we do. Our team is also invested in 100% ASTM compliance by having team members certified by the Internationally recognized Safety and Inspection agency, the National Association of Amusement Ride Safety Officials (NAARSO).

SAFETY

No matter how much one prepares to prevent any and all incidents, **SKYSTAR** carries \$10,000,000 in liability insurance in the highly unlikely situation that would require a claim.

This team inspects, maintains, manages and operates the best attraction in the state of Georgia

Georgia State Fire Marshall

Everyone from the smallest precious cargo to those that have seen decade after decade come and go, loves the elegance and beauty of an iconic attraction like **SKYSTAR** but for some they are consigned to just enjoy it from the ground due to various physical limitations. We are proud to say that **SKYSTAR** is fully handicap accessible with each of our fully enclosed gondolas capable of allowing a wheelchair to be wheeled in and still provide room for family members and friends. With **SKYSTAR**, no one will ever be grounded!

ACCESSABILITY

The **SKYSTAR** team are the pioneers of Observation Wheels in the United States as we brought the first one to the East Coast and then we stepped up our game by bringing the largest transportable Observation Wheel to the United States and effortlessly took on the challenge of placing an iconic structure in the middle of a downtown urban location. We will tackle any challenge to bring a spectacular attraction to where you want.
