

Get more out of Intacct with Apps

The SIG Mission

The Sage Intacct Systems Integration Group (SIG) provides customers with hosted, easy to implement solutions that seamlessly extend the functionality of Intacct Core Financials. SIG serves as a technical business partner specializing in customization, integration and data management services that enable customers to get more out of Intacct and to reduce total cost of ownership.

Key Benefits

- SIG Solutions are all covered by the Intacct Buy with Confidence Guarantee
- Offers the same SLA and guarantees as the Intacct Core product
- Hosts, manages and maintains customizations and solutions on behalf of customers (99.999% uptime/availability)
- Able to deliver solutions and 3rd party integrations (e.g. SFDC) using a wide variety of technologies, languages and platforms to fit customer's needs
- Delivers reliable, secure and scalable solutions using proven development methodologies and service processes (SSAE16 Compliance)
- Scalable, experienced execution teams (projects ranging from 4 hrs. to 2,000 hrs. or more)
- Focused on repeatable solutions

SIG Solution Offerings

FIXED ASSETS

Automatically share all asset acquisition, depreciation, and disposal information between the fixed asset register and general ledger, accounts payable and purchasing

PRE-PAID AMORTIZATION

Amortize prepaid expenses over a period of time via scheduled General Ledger journal entries

COLLECTIONS

Organize and streamline collections and dunning activities in order to reduce the receivables cash cycle and improve cash flow and average DSO performance

VAT SOLUTION

Automatically record VAT/Sales Tax impact of purchase and sale transactions directly to the General Ledger, immediately reflecting changes throughout Intacct Core Financials

DIGITAL BOARD BOOK FOR SAAS METRICS (OE)

Make better, faster strategic decisions with real-time SaaS metrics tailored to your business processes. Drill-down to transaction-level data

LOCKBOX

Automate application of payments received by a customer's bank. Supports both automatic and manual matching of Payments to Invoices

ADVANCED CSV IMPORTS

Provides easy, robust extension of Intacct Core's financial transaction import capability to meet custom and/or batch-file import needs

CREDIT CARD AND BANK STATEMENT UPLOADS

Easily import large numbers of Credit Card and Bank Account transactions each month for fast, error free journal entry creation

Take the next Step

Find out how partnering with Sage Intacct SIG enables you to get the most out of Intacct.
