### Remodeling or building a home without an interior designer? We can help!

Homeowners often want to do their own interior design when building or remodeling a home. However, interior designers provide specifications that contractors need when implementing things from structural changes to installing new faucets or tile. Without services typically provided by interior designers, individual sub contractors are unable to proceed with their work or to bid the project correctly. We are interior designers that will take clients' interior design ideas and plans and turn them into drawings, schedules and specifications that are required for a successful, on-budget build or remodel, as well as provide them with the resources they'll need to do things themselves.

Without the proper drawings and specifications, it is easy for projects to become late and over budget. Let our firm, which has delivered XX projects over XX years, help you keep things on track.

# Specification and Drawing Services

Bridging the gap between homeowners and contractors during building or remodeling projects

Image: House image #?

Homeowners often want to do their own interior design when building or remodeling a home. However, interior designers provide specifications that contractors need when implementing things from structural changes to installing new faucets or tile. Without services typically provided by interior designers, individual sub contractors are unable to proceed with their work or to bid the project correctly. Even if there is an architect on the project, many do not issue an ID Set (Interior Design Set). Spec Design Group is here to fill that gap. We are interior designers that will take clients' interior design ideas and plans and turn them into drawings, schedules and specifications that are required for a successful, on-budget build or remodel.

## SERVICES WE PROVIDE FOR HOMEOWNERS

- Interface with both client and contractor to make sure they are aligned
- Create a schedule for the client and prompt them when it is time to shop for a certain item
- Provide a list of GC (what is this) preferred vendors for them to shop with
- Turn client interior design selections into specifications and tag plans, for any pieces necessary for a home to be built or required for this remodel:
- Plumbing, Appliances, Mouldings, Interior Doors, Cabinets, Hard Surfaces (Including counters, and showers), Flooring, Motorized Window Coverings, Hardware, Room Finish Schedule, Lighting - Recessed, Decorative and Exterior, Electrical Outlets, Exterior Hardscape Materials (WOULD BE GOOD FOR THE WEB DESIGNER TO MAKE THIS LIST LOOK NICE)

**Professional contractors are used to receiving this information.** Without the interior designer, the contractor often has to step in to guide the client. This takes him or her away from their actual job of building the house, which translates to a project that becomes late and over budget.

## SERVICES WE PROVIDE TO CONTRACTORS

- Jeanette write this
- Jeanette write this
- Jeanette write this

## WHY SPEC DESIGN GROUP

- X years of experience doing this as well as interior design
- Interior design sensibility to help you achieve the best result
- Over X projects completed
