

MAKE THESE CHANGES

When you click on Learn More it should take you to this:

SERVICES WE PROVIDE FOR HOMEOWNERS

- Interface with both client and contractor to make sure they are aligned
- Create a schedule for the client and prompt them when it is time to shop for a certain item
- Provide a list of GC (what is this) preferred vendors for them to shop with
- Turn client interior design selections into specifications and tag plans, for any pieces necessary for a home to be built or required for this remodel:
- Plumbing, Appliances, Mouldings, Interior Doors, Cabinets, Hard Surfaces (Including counters, and showers), Flooring, Motorized Window Coverings, Hardware, Room Finish Schedule, Lighting - Recessed, Decorative and Exterior, Electrical Outlets, Exterior Hardscape Materials (WOULD BE GOOD FOR THE WEB DESIGNER TO MAKE THIS LIST LOOK NICE)

Professional contractors are used to receiving this information. Without the interior designer, the contractor often has to step in to guide the client. This takes him or her away from their actual job of building the house, which translates to a project that becomes late and over budget.

WHY SPEC DESIGN GROUP

- X years of experience doing this as well as interior design
- Interior design sensibility to help you achieve the best result
- Over X projects completed
