

Dear Sirs!

Our specialists provide electrical, mechanical, millwright and welding service to our commercial clients for over 20 years. Our solid foundation of experience, expertise and high quality standards demonstrates our commitment to unparalleled client satisfaction and adherence to both schedule and budget requirements. The breadth of our success is due in part to our ability to provide complete electrical and millwright services for all facets of operation.

We specialise in the complete installation of electrical services to commercial, industrial and public developments. We also carry out routine maintenance to existing electrical, mechanical and structural installations. We can provide fully combined industrial mechanical and electrical services in which clients benefit from a seamless supply covering all their M&E requirements. Our company undertakes full coordination of the services to provide a first class mechanical/millwright and electrical installation, welding fabrication, pipe lines (b-pressure) and equipment repair. Over the years this method has enabled us to deliver multiple combined service solutions.

Our range of services include: MV electrical installation, HV cabling and switchboards, lighting, general power systems, electrical refurbishments, power distribution, secondary power supplies and generation, energy management, complete design and implementation of complete data and voice systems, fibre optic, security systems and solar power systems.

Welding: SMAW(arc/stick welding), B-pressure, GMAW(MIG welding), GTAW (TIG/heliarc welding)

We have thorough knowledge of machines and tools, including their designs, applications, repair, maintenance and fabrication.

We provide assembly installation and maintenance for the following machinery and equipment:

Conveyors/elevators (belt, bucket, chain, screw, roller, vibrating)

Mills (ball, hammer)

Rotating machinery, pumps, mixers (external/internal gear, shuttle block, flexible/sliding vane, helical twisted roots or liquid ring vacuum pumps)

Pumps (rotary, piston, diaphragm, gear, hydraulic, plunger, peristaltic)

Compressors (centrifugal, diagonal or mixed-flow, axial flow, reciprocating, rotary screw, rotary vane and diaphragm)

Turbines (gas, steam, water, wind)

Laser alignment (Pulley Partner - belt sheave alignment laser, Rotalign PRO EX - advanced coupling alignment laser)

Our international experience extends to Israel, Ukraine, Russia, Canada.

Our customers:

- Fat and cooking oil refinery plant, Odessa, Ukraine
- Fat and cooking oil refinery plant, Moscow, Russia
- Sunflower grain elevator Odessa, Ukraine
- Magnesium plant of Dead sea, Israel
- Haifa Chemicals, Haifa, Israel
- Rotem industrial Ltd. Negev, Israel
- Makhteshim Chemical Works Ltd, Beer-sheva, Israel
- Lotus track company Edmonton AB
- Viterra grain elevator Acheson AB
- Ed-Lam Fort Saskatchewan AB
- B & H Tracking LTD Edmonton AB
- Canadian oats Edmonton AB
- Lehigh cement group Edmonton AB
- North Alberta Processing Co Edmonton AB
- Parkland county
- Vertex Sherwood park AB
- Ward chemical Villeneuve AB
- Westlock terminals Westlock AB
- Ryerson Niversity Toronto ON,
- LOBLAWS
- Osprey Publisher ON
- ACCENTURE ON
- TELUS
- Rogers
