Each of these areas will go **exponential** in the next 10 to 20 years.

We are **in** for a radical adjustment to the very mechanisms of **production** and the very **structure** of our economic and social **life**.

WE GO
THE EXTRA MILE

TO OUTER SPACE...

The background of the entire slide is a deep space image. It features a large, detailed blue planet on the right side, with a bright light source (like a star) partially obscured by it, creating a lens flare effect. Several smaller, distant planets and galaxies are visible in the dark blue and black void of space. A solid blue vertical bar is located on the far left edge of the image.

...AND BACK

Analyse, evaluate and **deliver.**

Again and again.
Until it works.

If there is a common theme to our **success.**
It's that we ignore the impossible.
