

Software Quality Experts

Presentation

We are fully dedicated to software quality services.

Our vision

Our vision recognizes that developers and organizations need to integrate efficient quality assurance into the software lifecycle, while freeing up resources, cutting costs, and supporting regulatory compliance.

Our mission

We help organizations develop application testing strategies and execution models that focus on defect prevention. We build a service company by developing talent, which enable us to help our customers concentrate on their application delivery goals.

Our values

- Passion for Quality
- Problem solvers
- Adding value oriented
- Responsibility
- Honesty
- Integrity

Market studies demonstrate the need of tracking defects earlier.

Software quality matters if you ...

Need to detect faults earlier !

Relative Cost to Repair a Defect at Different Project Lifecycle Phases

“On average, more than 50 percent of IT projects are at risk”

Q-leap provides a wide range of quality services.

Software Development Life Cycle

PLAN
6 months – 1 year

BUILD
1– 3 year

DELIVER & MAINTAIN
Typically 10 years
