

Wavelength Case Study: Office

Oscar

Oscar Health is an innovator in healthcare, bringing technology and a fresh perspective to the industry. The Wavelength Lighting service does likewise, transforming LED lighting from a risky capital expense into a supported and serviced operating asset that costs less. Wavelength and Oscar made a perfect match for their Manhattan corporate headquarters.

Key project attributes

- Reduce net operating cost of the facility without capital outlay
- Make a meaningful aesthetic improvement without construction or office downtime
- Achieve a key sustainability milestone
- Convert a range of fluorescent applications (T5, T8, and T12) into modern solid state LED technology

“Working with Wavelength Lighting made the transition to LED lighting very straightforward. The installation process was smooth, the service since has been great, and now we have a lighting system that costs less and is more sustainable” - **Director of Workplace Operations, Oscar Health**
