

## KEY BENEFITS

### Visa PA-DSS Certified

#### Integrations

Credit Card Advantage integrates with Microsoft Dynamics GP, and provides superior functionality and flexibility, which can be expanded to support recurring contract billing, online bill pay, e-commerce, and retail integration.

#### Security and Fraud Prevention

Supports Address / ZIP Verification, CVV2, Level 2 and Level 3 Verification, and Visa PABP Certified for PCI-DSS Compliance.

#### Cost Efficient

Eliminates redundant, error-prone data-entry and reduces time spent on reconciliation by as much as 75% for achievement of a rapid ROI.

#### Fast Deployment

In less time than it takes to eat lunch, CCA can be deployed and begin processing credit card transactions from SOP, Account Receivable, and Cash Receipts

#### Trusted

With almost 1,000 global customers, CCA has a proven track record and leads the market in reliability, robustness and ease of use. Nodus is the only one-stop shop for electronic payment processing software and services in the MBS market.

- Real-Time / Batch Mode Verification
- Automatic Reconciliation
- End of Day Procedures
- Card Transaction Reports
- Level 2 and Level 3 Verification
- Multiple Payment Gateways
- Merchant Account Services
- ACH, eCheck, and More!

## Credit Card Advantage

### The First PA-DSS Certified Credit Card Software for MS Dynamics GP

**In an effort to guard against cyber data thefts and stop credit card numbers and sensitive information from being compromised en masse, the Payment Card Industry Data Security Standards Council adopted Visa's PABP security initiatives and mandated that all credit card processing software MUST meet PA-DSS standards.** The credit card giant, Visa, is enforcing their security mandates, which requires their acquirers (the financial institutions who provide merchant account service) - NOT accept merchant accounts for any company using payment applications that are not certified to meet PA-DSS security standards.

**As the leader for electronic payment applications in the Microsoft Dynamics market place, Nodus is committed to providing only the most secure credit card processing applications.** Credit Card Advantage (CCA) DSS is the first PA-DSS certified integrated payment solution for Dynamics GP. Nodus also offers a "Tokenization" version for those who want to store sensitive credit card information in a secure offsite data vault.

Both versions of CCA help merchants meet PCI compliance standards, while empowering them to benefit from productivity improvements resulting from integrated payment functions with accounting systems, as well as getting merchant accounts at very competitive rates.

### Speed and Simplify Credit Card Processing for Microsoft Dynamics GP

**Companies today need a system for accepting credit cards that is fast, secure, and reliable. With Nodus' Credit Card Advantage, businesses experience faster approval times and automatic data transfer to the your accounting solution which increases productivity, reduces overhead, and streamlines business operations allowing for the achievement of a rapid ROI. And with the addition of our merchant services, Nodus is a "one-stop shop" for all e-payment needs!**

**This solution goes beyond just standard credit card processing.** Tight integration with multiple payment gateways, processors, and back office environments delivers flexible, reliable services from the first transaction. Credit Card Advantage is simply the most powerful and secure electronic payment solution in its class!

### More Functionality for E-Payment Solutions

**Credit Card Advantage provides the power and flexibility to add more functionality to the accounting solution.** With customer experiences becoming increasingly web centric, Nodus provides easy, optional add-ons that make it easy for businesses to have e-Commerce and online bill payment solutions seamlessly integrated with the accounting system.

### One-Stop Shop for Payment Processing Software and Services

**In addition to providing our acclaimed Credit Card Advantage for processing credit card and electronic check payments within Microsoft Dynamics GP, Nodus provides payment gateway, merchant account and electronic check services.** Nodus is the only vendor that can provide a single point of contact for both software and electronic payment support and services.

### PCI Compliance: Encryption, Assessment and Security Scanning

**Nodus also provides the only commercially available Credit Card Encryption solution** which features advanced 256-bit key encryption for those companies who store credit card info in the Microsoft Dynamics GP Customer Card file. All credit card numbers are masked down to the last 4 digits, meeting the strictest state and government requirements. In addition, Nodus offers a PCI self-assessment questionnaire, as well as quarterly security scanning to meet full PCI Compliance.

## CUSTOMER SUCCESS STORIES

"Using Nodus' Credit Card Advantage, we've migrated to a paperless office. This powerful solution simplifies the way we process credit cards and enables us to book transactions and pre-authorize payments, effectively minimizing our exposure on COD orders."

- Tina Lemanowicz, eBlueprint.com
