

A logo for company, companyname is **NUBOLD**, tagline is "Mobile & Cloud"

Colorscheme should be shades of blue with gray like in the shirt design.

Important is that there is a mobile phone and a cloud in the logo. **The idea is to indicate the integration/interaction between mobile and cloud.**

My ideas and own trails.

I like having the N in a different color.

The interaction/integration between mobile devices and cloud services should be clear. Something like this.

I like this (but without the yellow)

Use this colorscheme.
