The Task List

Split projects into tasks, delegate employees, track the progress and tick them off one by one.

The Inventory Section

Add new inventory items, track the amount, add vendors and know when to reorder.

“

Taskify has made a huge difference on my day-to-day struggles in keeping all our projects organised. I have decided to make the software available to the public, as I see a big need for a simple project manager, not only in the cabinet maker industry, but all tradesmanship businesses.

In the long-term we want to build a community around Taskify and help business owners grow their businesses without getting stuck in endless paperwork and headaches.
