

GeoSpark ANALYTICS

Driving Decision Through Actionable Insights

Our Hyperion Platform invents the 25th hour by solving the human scale problem of scouring, processing, correlating, assimilating and sense-making location-based data. We simplify a world riddled with uncertainty. We do this by analyzing millions of relevant data points using our expertly trained Artificial Intelligence. Hyperion delivers real-time insights, automated comprehensive reporting assessments, and anomaly alerting of relevant activities that could pose a risk to your operations, assets, security posture and brand reputation.

- ❖ Crime Pattern Analysis

Why GeoSpark Analytics?

We are the only founding team born from the National Geospatial-Intelligence Agency with decades of experience conducting and leading expert intelligence operations and we fully understand stability and threat analysis. We now apply this expert knowledge to the civil and commercial problems and build solutions that not only answer where but what and why.
