

SNAPDATE ICON DESIGN

APP SPECIFICATIONS

SNAPCHAT is a big thing in USA right now.

We have came up with an idea to build an app that let's users exchange their Snapchat ID on App-Bullet-in-Board to make new friends, especially new opposite-sex friends.

In a way, we say we are creating an app that is
SNAPCHAT + DATING APP = SNAP DATE.

DESIGN SPECIFICATIONS

Below is the rough design of the app icon that we want to create.

YOUR JOB IS TO GIVE ABOVE ICONS A MORE PROFESSIONAL-LOOK

- Background must be yellow in basic. But little gradation can be added.
- There must be a high-quality ghost-illustration.
- Ghost's eyes must be a heart mark to represent that this is an dating-like app.
- DO NOT copy the SNAPCHAT ghost. We want some original design for this.
- The design can be either rich or flat-iOS7-like. But it can't be cheap design.
