

FontGuard™
Piracy Prevention System

What is FontGuard?

- Letterhead Fonts utilizes the FontGuard system in order to prevent font piracy.
 - Each of the fonts you have purchased have been embedded with your unique account ID, email address, name and IP address.
 - This allows the fonts to be traced back to the original purchaser should they become publicly shared.
 - Letterhead Fonts does prosecute those who participate in acts of piracy.
 - Please protect yourself. Do not share your fonts with any third party. Always convert your fonts to curves before sending your file to a printer. Or recommend they purchase their own copy of the font.
-

Help us continue our craft

The artists who create Letterhead Fonts need your support and encouragement. By simply abiding by the laws and not sharing your fonts you are encouraging us to make new fonts for you. Please continue to support these artists and encourage them to make new fonts by not sharing Letterhead Fonts with others. Thank you for your support.
