1.75" OVERLAP OF BANNERS

40.5" x 87"

1.75" OVERLAP OF BANNERS

NOTE: Background image of each banner should fill entire grid area to the crop marks. Avoid putting critical art elements in all the gray areas, or they could be hidden from view or trimmed off.

If you choose to use this version of the grid, you must setup and submit separate artwork for each banner. When these units are put together, there is a 1.75" overlap between the banners. Therefore we have marked out safe areas to avoid for overlap.

The Myriad banner stands cannot be used at half height, due to how the banner clips to the top of the pole and how the pole connects to the base.
