CAN YOU CALCULATE YOUR SHOOTING PERCENTAGE?

Basketball players keep track of their shooting percentages.
The next time you shoot hoops, take your activity book with you
and ask someone to help you calculate your shooting percentage.
Keep practicing to improve your percentages.

A player's field goal percentage is a simple statistic to compute.
Only two numbers are required: the number of made baskets, and the number of total attempts.
The FG% is the number of made baskets divided by the total number.

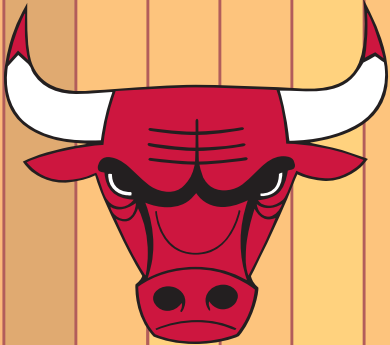

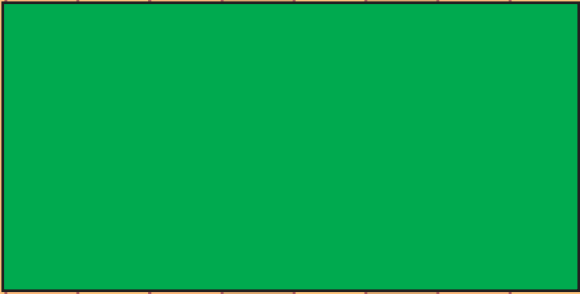

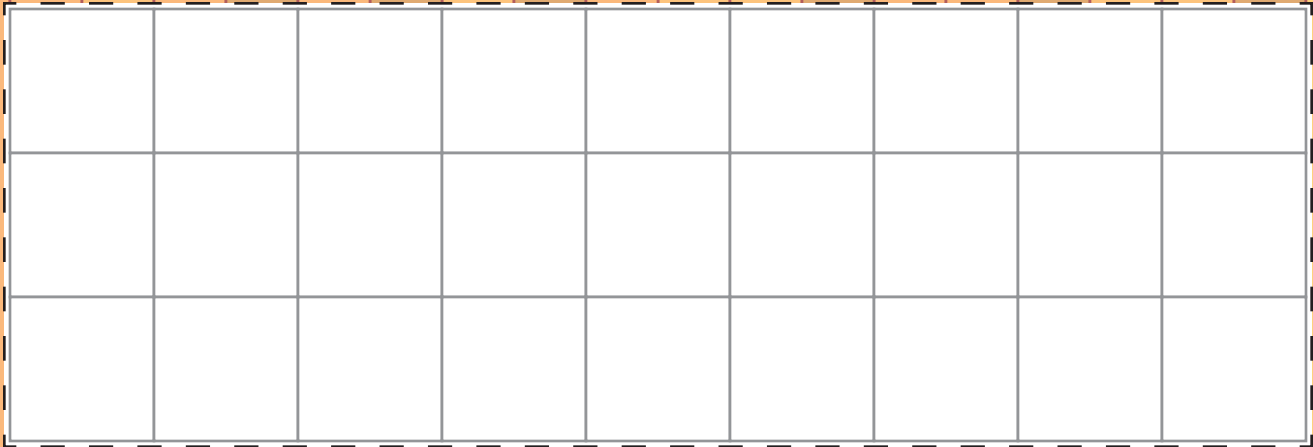

$$FG\% = \frac{\text{Baskets Made}}{\text{Baskets Attempted}}$$

Baskets Attempted	_____	Baskets Made	_____	= FG%	_____
Baskets Attempted	_____	Baskets Made	_____	= FG%	_____
Baskets Attempted	_____	Baskets Made	_____	= FG%	_____
Baskets Attempted	_____	Baskets Made	_____	= FG%	_____

Darla Hall was born in Indiana and now resides in Alabama. She grew up in a small town where she loved playing and watching sports. This book concept was developed in 2012 when a young boy she knew was hit by a car and broke both of his legs. She created her first team activity book as a gift for him because he loved his favorite team. Her company, In the Sports Zone (ITSZ), now has hundreds of titles available at www.inthesportszone.com.
