# Machining

Our In-house capabilities

Founded by a third generation machine shop owner, obsessed with streamlining the manufacturing process from start to finish.

Hart Industries brings their machining knowledge to the table every day working closely with our customers to put value into each part we produce. Working as a strategic partner, Hart Industries is able to deliver precision machined components with the highest quality, on time, and at the most cost effective price.

We have worked successfully with a wide range of clients and industries. We will produce your parts efficiently and with superior quality. We pride ourselves in CNC Precision Machining excellence from milling, drilling, tapping, boring and turning to ensure the best quality on all your projects.

Tolerances of  $\pm .0001$

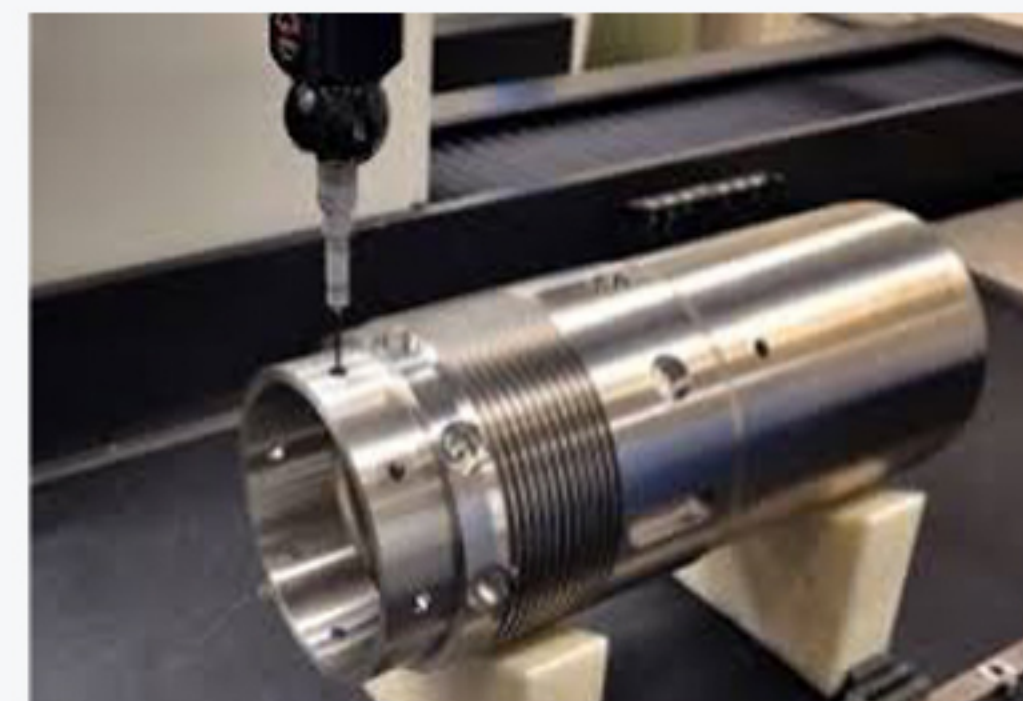

Custom Built Fixtures/Tooling

Prototypes to Production Runs

Assemblies

CMM

## Supplemental Sourcing for Customers

In addition to our in-house capabilities we also are an excellent resource for Overloaded Purchasing Departments in optimizing customer procurement costs by finding the Specialists for unusual machining requirements and secondary operations and leveraging Open Machine Time with suppliers for improved costing.
