

Product Overview

Culchar is an online management tool that aggregates employee feedback in the form of weekly Engagement Surveys. Each week the employees are only asked one question, resulting in more responses each week.

Anonymity - The entire platform is built on the principle of ***anonymity***. Anonymity gives employees the confidence to voice their thoughts and add real value to the business by being open and honest with their feedback across 3 categories.

Management Dashboards - All feedback is automatically aggregated into user-friendly graphs for management to review and take action. No more Excel spreadsheets or having to wait days, weeks or months for critical insights, everything is automated and done in real-time.
